Voyage Spirite En Par Allan Kardec:

Investigating the Supernatural Sofie Lachapelle, 2022-02-03 A convincing account of science's flirtation with the marginal and the marvelous from the author of *Conjuring Science* *Journal of the History of the Behavioral Sciences* Sciences were wildly popular in France between 1850 and 1930 when members of the general public and scholars alike turned to the wondrous as a means of understanding and explaining the world Sofie Lachapelle explores how five distinct groups attempted to use and legitimize sciences: spiritists who tried to create a new science concerned with the spiritual realm and the afterlife; occultists who hoped to connect ancient revelations with contemporary science; physicians, psychiatrists and psychologists who developed a pathology of supernatural experiences; psychical researchers who drew on the unexplained experiences of the public to create a new field of research; and metapsychists who attempted to develop a new science of yet to be understood natural forces An enlightening and entertaining narrative that includes colorful people like Allan Kardec a pseudonymous former mathematics teacher from Lyon who wrote successful works on the science of the science and what happened after death *Investigating the Supernatural* reveals the rich and vibrant diversity of unorthodox beliefs and practices that existed at the borders of the French scientific culture in the late nineteenth and early twentieth centuries What is science In her engaging book Sophie Lachapelle probes for an answer by looking at the liminal realm between science and superstition and the attempt to render the supernatural explicable in naturalistic terms Isis A welcome addition to the growing literature on spiritism, occultism and physical research in modern France *French History* Catalogue général de la librairie française: 1840-1875, matières : M-Z, 1880 *Catalogue général de la librairie française: 1840-1875.
