The UN Convention on the Elimination of All Forms of Discrimination Against Women and Its Optional Protocol Patricia Schulz, Ruth Halperin-Kaddari, Beate Rudolf, Marsha A.

Freeman, 2023-01-27 This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol. It reflects the developments during the decade following the publication of the first edition in 2012 which has also seen a notable rise in individual complaints more than 85, ten new General Recommendations and six new inquiry procedures as well as numerous statements partly in conjunction with other UN human rights bodies. The Convention is a key international human rights instrument and the only one exclusively addressed to women. It has been described as the United Nations landmark treaty in the struggle for women's rights. At a time when the backlash against women's human rights and the concept of gender-based discrimination is increasingly challenged by governments and powerful societal actors, the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention. The Commentary analyses the interpretation of the Convention through the work of its monitoring body, the Committee on the Elimination of Discrimination against Women. It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol, including a separate chapter on the cross-cutting substantive issue of violence against women. The sources relied on are the treaty language and the general recommendations, concluding observations and case law under the Optional Protocol, individual complaints and inquiries through which the Committee has interpreted and applied the Convention. Each chapter is self-contained but the Commentary is conceived of as an integral whole. The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women's human rights worldwide.

Children's Environmental Rights Under International and EU Law Francesca Ippolito, 2022-11-07 This book is dedicated to a topic which has for a long time lacked the attention it deserves within the academic world. It intends to address in a coherent and comprehensive manner the problem of the environmental rights of the child which are not identical to the ones of adults whose environmental rights have been appraised from a general point of view. In the absence of any international law instrument explicitly granting a child the right to a clean environment, drawing on an extensive and original analysis of the UN Convention on the Rights of the Child and the practice of its monitoring body, this book undertakes an assessment of the extent to which these challenges may be overcome.

through a greater engagement between international law on the rights of the child and international environmental law The result is the first comprehensive study on the manner in which these two mutually reinforcing legal regimes can interact to strengthen the protection of children s environmental human rights at stake in the increased strategic environmental and climate litigations at both the national and international level The book is recommended reading for amongst others policy makers international environmental lawyers and human rights lawyers and practitioners Additionally lecturers students and researchers from a range of disciplines will also gain from seeing how new legal scholarship and intertwined branches of international law contribute to the continual development of the living rights of the human rights conventions Francesca Ippolito is Associate Professor of International Law in the Department of Political and Social Science of the University of Cagliari Italy She holds the Jean Monnet Chair on European Climate of Change REACT for 2021-2024

Corporate Social Responsibility and Discrimination Christina Keinert-Kisin,2016-04-27 This book presents and

deconstructs the existing explanations for the differential career development of qualified men and women. It reframes the problem of discrimination in the workplace as a matter of organizational ethics, social responsibility and compliance with existing equal opportunity laws. Sensitive points are identified where social biases, decision makers' individual economic interests and shortcomings of organizational incentive policies may lead to discrimination against qualified women. The ideas put forward are empirically tested in an original laboratory experiment that examines personnel selection in the male dominated field of science and technology. It contrasts the selection of applicants with gendered and gender blind applications available to subjects under controlled conditions. 30% of participants were high level decision makers which is unprecedented in this field of research. The results highly relevant for organizational practice are explained and discussed in detail. The Report: Peru 2017 Oxford Business Group, Over the last decade Peru has consistently been the fastest growing economy in Latin America and unlike some of its neighbours has been remarkably resilient to global headwinds registering positive growth rates for an uninterrupted 18 years through to 2016. While the pace of growth has slowed as the long commodities boom ebbed after 2012, Peru recorded an average annual growth rate of 5.9% in 2005-15, almost double the 3% rate for Latin America as a whole. Stakeholders and investors will now be looking to efforts by the new government which took office in July 2016 to address problems, implement additional reforms and spur further economic growth. **Recent Advances in Partial Differential Equations and Applications** Vicențiu D. Rădulescu, Adélia Sequeira, Vsevolod A. Solonnikov, 2016-06-28. This volume contains the proceedings of the International Conference on Recent Advances in PDEs and Applications in honor of Hugo Beirão da Veiga's 70th birthday held from February 17-21, 2014 in Levico Terme, Italy. The conference brought together leading experts and researchers in nonlinear partial differential equations to promote research and to stimulate interactions among the participants. The workshop program testified to the wide ranging influence of Hugo Beirão da Veiga on the field of partial differential equations, in particular those related to fluid dynamics. In his own work, da Veiga has been a seminal influence in many important areas: Navier-Stokes equations, Stokes systems, non-Newtonian fluids, Euler equations, regularity of solutions, perturbation theory, vorticity phenomena and nonlinear potential theory, as well as various degenerate or singular models in mathematical physics. This same breadth is reflected in the mathematical papers included in this volume. World Bank East Asia and Pacific Economic Update, Spring 2020 World Bank, 2020-04-07. Growth in the developing East Asia and Pacific region slowed sharply in 2020Q1 because of the negative impact of the Covid-19 on economic activity. The decline has been broad based, reflecting the interconnectedness of the EAP economies and reverberations from the global economy as the virus turned into a pandemic. The Covid-19 outbreak followed an extended period of subdued growth in the region amid multiple external headwinds and heightened trade policy uncertainty. China and other regional economies have implemented monetary and fiscal policy measures to mitigate the negative impact of the outbreak. Growth in the East Asia and Pacific EAP region is projected to slow from 5.8 percent in 2019 to lower than expected.

5.2 percent in 2020 reflecting the expected negative effects of the COVID 19. In this baseline scenario which is subject to significant uncertainty, growth in the region is expected to recover to 5.6 percent in 2021 as the impact of Covid 19 gradually dissipates. In the medium term, regional growth is expected to continue its downward trend reflecting multiple structural headwinds. Policymakers should focus on designing economically efficient transmission control policies that consider both the marginal costs and the marginal benefits of preventive measures. Such policies would ideally be based on countries' preparedness and exposure as well as economic circumstances. Targeted fiscal and monetary policies can help reduce the economic disruption caused by COVID 19 in the short term. In the medium term, there is a need to restore depleted buffers, address sources of financial instability and invest in preventing and coping with infectious disease. Given the growing interdependence between EAP countries, coordinated policies and investments could increase resilience to shocks.

Mechanics Of Elastic Solids David W A Rees, 2018-09-26. This book examines the issues across the breadth of elasticity theory. Firstly, the underpinning mathematics of vectors and matrices is covered. Thereafter, the equivalence between the indicial symbolic and matrix notations used for tensors is illustrated in the preparation for specific types of material behaviour to be expressed usually as a response function from which a constitutive stress-strain relation follows. *Mechanics of Elastic Solids* shows that the elastic response of solid materials has many forms. Metals and their alloys conform dutifully to Hooke's law. Non-metals do not when the law connecting stress to strain is expressed in polynomial, exponential and various empirical material-specific forms. Hyper and hypo-elasticity theories differ in that the former is restricted to its thermodynamic basis while the latter pervades many an observed response with its release from thermal restriction but only at the risk of contravening the laws of thermodynamics. This unique compendium is suitable for a degree or diploma course in engineering and applied mathematics as well as postgraduate and professional researchers.

Rotating Machinery, Hybrid Test Methods, Vibro-Acoustics & Laser Vibrometry, Volume 8 James De Clerck, David S. Epp, 2016-06-29. *Rotating Machinery Hybrid Test Methods Vibro Acoustics Laser Vibrometry Volume 8* Proceedings of the 34th IMAC A Conference and Exposition on Dynamics of Multiphysical Systems From Active Materials to Vibroacoustics 2016, the eighth volume of ten from the Conference brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Structural Dynamics including papers on Processing Modal Data, Rotating Machinery, Vibro Acoustics, Laser Vibrometry, Teaching Practices, Hybrid Testing, Reduced Order Modeling.

It is co-

written by a team of eighteen experts who have conducted a combined total of 300 seasons of fieldwork in Nunavut They document 295 species of birds of which 145 are known to breed in the territory presenting a wealth of information on identification distribution ecology behaviour and conservation Lavishly illustrated with over 800 colour photographs and 155 maps it is a visually stunning reference work on the birds that live in and visit Nunavut Teacher Education Intersecting Comparative and International Education Florin D.
