A Love to Last

This essay is about two people from different worlds who met under unique circumstances. The story portrays betrayal, love and trust. Joe Puckett was a famous movie star who was framed for the murder of his wife by his wife's lover. After five years, he was convinced that his lawyers were no longer interested in proving his innocence, and he broke out of jail. After walking for miles, he arrived at a petrol station, where there was a car parked. The vehicle belonged to Jane Brown, a kind teacher at a local elementary school. After she gave him a ride, she recognized him when the radio announced that Joe Puckett, a convicted murderer, had escaped. Joe took Jane hostage and took her to a cabin in the forest. They bonded and she promised to help him prove his innocence. The conversation below occurred after Joe had been arrested again, but he was proved innocent and released from jail. Thinking that Jane betrayed him, he does not want to see her, but he receives a parcel that changes his mind:

"I am not talking about this anymore. As far as I know, Jane is dead to me. She betrayed me so that her rude boyfriend could have a breakthrough in his journalism career," Joe said as he got up, ready to leave.

Henry stood up and blocked his way using his hand. "Joe, you do not seriously believe that Jane betrayed you. After all the sacrifices that she made for you, I do not think that she would do that to you."

The two men were arguing about a woman for the first time in thirteen years, which was how long they had known each other. Henry and Joe had met the first time acting as extras in a

Problem-Based Learning in Clinical Education Susan Bridges,Colman McGrath,Tara L. Whitehill,2012-01-05 Developed in the context of health sciences education in the late 1960s problem based learning PBL is now widely deployed as an education methodology Its problem solving collaborative student centred ethos is seen as a more appropriate system of pedagogy than earlier chalk and talk modes Focusing on its use in clinical education this collection of recent scholarship on PBL examines the ways in which PBL is both conceived and implemented in clinical education The work has a dual emphasis research driven on the one hand while on the other assessing new methodologies to explore how problem based curricula support the achievement of students learning outcomes in the context of clinical education The chapters draw on studies that explore PBL both theoretically and empirically The volume s eclecticism capitalises on the growing body of empirical research into PBL evaluations It balances this with studies analysing the relatively new area of discourse based research on PBL in action whose focus has been to interrogate the how of student learning in curricula with PBL content This publication will be of interest to clinical teachers curriculum designers and those interested in innovations in the scholarship of teaching and learning in PBL curricula

Qualitative Research Methods in Education and Educational Technology Jerry W. Willis,2008-10-01 Qualitative Research Methods in Education and Educational Technology was written for students and scholars interested in exploring the many qualitative methods developed over the last 50 years in the social sciences The book does not stop however at the boundaries of the social sciences Social scientists now consume and use research methods from many fields The rich resources of research methods and theories from both the humanities and philosophy are also covered in this book It explains why postpositivist quantitative research should not be the only game in town and provides solid theoretical foundations beginning with the positions of Plato and Aristotle for broadening our horizons about what warrants our attention Using Aristotle s concept of phronesis the author shows why methods such as narrative research and storytelling hermeneutic inquiry literary theory philosophical inquiry and much more have important applications in education and educational technology On those foundations the author also builds a

framework for doing many types of research from participatory action research to content analysis to postmodern case studies to empowerment research and philosophical inquiry He accomplishes this through a combination of original text summaries of exemplary research in education and educational technology and suggested readings that are annotated and introduced at the end of each chapter Many of these readings are available online and they extend the discussion of research methods or serve as exemplars of a particular type of educational technology research There are open ended and conceptual questions for each reading and developing your own answers to them is one way you can extend your depth of understanding about qualitative research methods in education and educational technology
