Kaiser, Timothy O'Leary, 2022-03-01 The Ends of Critique re examines the stakes of critique in the 21st century In view of increasingly complex socio political realities and shifts in a fully globalized world the roles and manners of critique also change The volume offers an unprecedented re examination of

critique under those conditions of global entanglement and asymmetrical relations from a diversity of scholarly perspectives within the humanities All contributions move the notion of critique into more diverse traditions than the Eurocentric Kantian tradition and emphasize the need to attend to a plurality of critical perspectives The volume's reflections move critique toward a situated perspectival and entangled critical stance with interventions from decolonial and systemic deconstructive and post humanist perspectives In that way the volume develops a decidedly different approach to critique than recent considerations of critique as post critique Felski or those indebted to Frankfurt School thought and liberal theories of democracy It is the first full length research publication of the interdisciplinary research network Terra Critica **Judith**

multidisciplinary research and theory from 17 different fields most of them never before applied to literary explication in order to provide 1 justification for the practice of a relative probability type of explication as distinguished from interpretation 2 a relativistic foundation for the preference of some explication's of a literary work over others and thereby 3 a middle way between the postmodern pluralist view that a work has only an unlimited number of equally acceptable though different explications and the modern intentionalist view that it has only one acceptable explication the author's Nine of the 17 fields are of primary relevance critical theory hermeneutics probability theory philosophy of science second order logic and four fields of cognitive science linguistics epistemology neuropsychology and artificial intelligence But the book also touches upon textual criticism legal theory measure theory fuzzy logic animal learning behavior developmental psychology evolutionary epistemology and neurobiology The book shows that those using a relative probability type of explication on a literary work can achieve consensus because the healthy adult human brain has an evolved uniform and probably innate ability to form relative probability judgments and to form them in the practice of activities like reading and explicating that are not uniform and innate Lastly the book contributes to the scholarly areas of explication theory and practice first by providing a relativistic foundation for a craft explication that currently is not acknowledged to have any foundation but nonetheless continues and will continue to be practiced and second by presenting a means relative epistemic probability by which judging some explication's of a literary work to be more acceptable than others may be justified philosophically an uncommon circumstance in this postmodern era in which philosophical justification of many beliefs and practices is thought to be untenable **The SAGE Handbook of Architectural Theory** C. Seeming Being in Plato's Rhetorical Theory marks a shift in Plato scholarship Reames argues that an appropriate understanding of rhetorical theory in Plato's dialogues illuminates how he developed the technical vocabulary needed to construct the very distinctions between seeming and being that separate true from false speech By engaging with three key movements of twentieth and twenty first century Plato scholarship the rise and subsequent marginalization of orality and literacy theory Heidegger's controversial critique of Platonist metaphysics and the influence of literary or dramatic readings of the dialogues Reames demonstrates how the development of Plato's rhetorical theory across several of his dialogues Gorgias Phaedrus Protagoras Theaetetus Cratylus Republic and Sophist has been both neglected and misunderstood
