Zeithaml, 2010-05-11 Excellence in customer service is the hallmark of success in service industries and among manufacturers of products that require reliable service But what exactly is excellent service It is the ability to deliver what you promise say the authors but first you must determine what you can promise Building on seven years of research on service quality they construct a model that by balancing a customer s perceptions of the value of a particular service with the customer s need for that service provides brilliant theoretical insight into customer expectations and service delivery For example Florida Power Light has developed a sophisticated computer based lightening tracking system to anticipate where weather related service interruptions might occur and strategically position crews at these locations to quicken recovery response time Offering a service that customers expect to be available at all times and that they will miss only when the lights go out FPL focuses its energies on matching customer perceptions with potential need Deluxe Corporation America s highly successful check printer regularly exceeds its customers expectations by shipping nearly 95% of all orders by the day after the orders were received Deluxe even put U S Postal Service stations inside its plants to speed up delivery time Customer expectations change over time To anticipate these changes Metropolitan Life Insurance Company regularly monitors the expectations and perceptions of their customers using focus group interviews and the authors 22 item generic

SERVQUAL questionnaire which is customized by adding questions covering specific aspects of service they wish to track. The authors' groundbreaking model which tracks the five attributes of quality service: reliability, empathy, assurance, responsiveness, and tangibles, goes right to the heart of the tendency to overpromise. By comparing customer perceptions with expectations, the model provides marketing managers with a two-part measure of perceived quality that for the first time enables them to segment a market into groups with different service expectations. *The Insurance Press*, 1926

**Measurement of Facilities**

**Management Performance in Ghana's Public Hospitals** Daniel Amos, Cheong Peng Au-Yong, Zairul Nisham

Musa, 2020-11-23. This book presents the concept of healthcare facilities management performance measurement (HCFMPM) using Ghana as a case study. It sets forth in depth theoretical and empirical underpinnings of performance measurement concepts for hospital facilities services with the view to demonstrate critical performance dimensions to improve FM contributions and added value to healthcare delivery. The research approach adopted is mixed method encompassing qualitative interviews in case study setting and a questionnaire survey of sampled hospitals in Ghana. The book presents a number of useful tables, graphs, as well as a pedagogic illustration of statistical analysis which are useful in understanding the concepts under reference. It develops a structural equation model for performance measurement of FM services. The book is of relevance to healthcare managers, facilities management practitioners, and academics towards measuring and improving FM performance in hospitals. Although the data used in the analysis is based on the case study country Ghana, the result is by extension useful to several developing countries faced with the challenge to improve FM services delivery in public hospitals as well as other facilities management sectors. **The American Contractor**, 1924
