Assessments and Measures in Psychotherapy Research: Going Beyond Self-Report Data Jessica Uhl,Brian Schwartz,2023-10-31 Tailoring the treatment to the individual patient can improve the effectiveness of psychotherapy To do so the treatment or strategy with the best prognosis for the individual patient can be selected at the beginning of therapy Furthermore the therapeutic approach can be adapted during the course of treatment To support the therapist in such decisions prediction algorithms are used which are able to process complex and comprehensive data precision mental health Statistical methods used in psychotherapy research to analyze data and develop predictive models have recently become more advanced However algorithms cannot do better than what the underlying data provide them in terms of information Therefore our predictions and recommendations could benefit from a broader range of data beyond the traditional patient or therapist rated questionnaires

Validity and Limitations of College Student Self-Report Data Serge Herzog,Nicholas A. Bowman,2011-06-28 Critics of student self reported data claim that the accumulated corpus of research documenting student learning on the basis of survey responses stands on shaky ground This volume argues that scholarship on proper use of student self report data is woefully underdeveloped and contributing authors offer several important insights to assist IR practitioners in identifying potential limitations associated with self report data Volume editors Serge Herzog director of institutional analysis at the University of Nevada Reno and Nicholas A Bowman postdoctoral research associate in the Center for Social Concerns at the University of Notre Dame have assembled contributing authors who are leading scholars in the field of college student self reports Combined the chapters draw on data from a mix of colleges and universities capturing student growth at different stages of the undergraduate experience and even beyond graduation This is the 150th volume of the Jossey Bass quarterly report series New Directions for Institutional Research Always timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Statistical and Methodological Myths and Urban Legends Charles E. Lance, Charles E. Lance, Robert J.

Vandenberg, 2010-10-18 This book provides an up to date review of commonly undertaken methodological and statistical practices that are sustained in part upon sound rationale and justification and in part upon unfounded lore. Some examples of these methodological urban legends as we refer to them in this book are characterized by manuscript critiques such as a) your self report measures suffer from common method bias b) your item to subject ratios are too low c) you can't generalize these findings to the real world or d) your effect sizes are too low. Historically there is a kernel of truth to most of these legends but in many cases that truth has been long forgotten, ignored or embellished beyond recognition. This book examines several such legends. Each chapter is organized to address a) what the legend is that we almost all know to be true b) what the kernel of truth is to each legend c) what the myths are that have developed around this kernel of truth and d) what the state of the practice should be. This book meets an important need for the accumulation and integration of these methodological and statistical practices.

Psychometrics R. Michael Furr, 2021-08-13 In this fully revised Fourth Edition of Psychometrics: An Introduction, author R. Michael Furr centers his presentation around a conceptual understanding of psychometric core issues such as scales, reliability and validity. Focusing on purpose rather than procedure and the why rather than the how, to this accessible book uses a wide variety of examples from behavioral science research so readers can see the importance of psychometric fundamentals in research. By emphasizing concepts, logic and practical applications over mathematical proofs, this book gives students an appreciation of how measurement problems can be addressed and why it is important to address them. The book offers readers the most contemporary views of topics in psychometrics available in the nontechnical psychometric literature.

Huebner, Timothy S. Bynum, 2016-04-13 This volume of the series was designed to provide a comprehensive

primer on the existing best practices and emerging developments in the study and design research on crime and criminology. The work as a whole includes chapters on the measurement of criminal typologies, the offenders, offending and victimization, criminal justice organizations and specialized measurement techniques. Each chapter is written by experts in the field and they provide an excellent survey of the literature in the relevant area. More importantly, each chapter provides a description of the various methodological and substantive challenges presented in conducting research on these issues and denotes possible solutions to these dilemmas. An emphasis was placed on research that has been conducted outside of the United States and was designed to give the reader a broader, more global understanding of the social context of research. The goal of this volume is to provide a definitive reference for professionals in the field, researchers and students. This volume in the *Handbooks in Criminology and Criminal Justice* series identifies the principal topical areas of research in this field and summarizes the various methodological and substantive challenges presented in conducting research on these issues. In each chapter, authors provide a summary of the prominent data collection efforts in the topical area, provide an overview of the current methodological work, discuss the challenges in the measurement of central concepts in the subject area and identify new horizons emerging in data collection and measurement. We encouraged authors to discuss work conducted in an international context and to incorporate discussion of qualitative methodologies when appropriate. **Practitioner's Guide**

to Empirically-Based Measures of Depression Arthur M. Nezu, George F. Ronan, Elizabeth A. Meadows, Kelly S. McClure, 2006-05-02. Neuropsychology of Aggression Joel S. Milner, 2012-12-06. This book reviews putative neurological and neuropsychological factors in aggressive behavior. Discussions focus on explanatory models, brain sites and cognitive functions that appear to be associated with aggressive behavior. Attention is given to measurement and design problems that are frequently encountered in the study of aggression. Further, it is emphasized that any relationship between neuropsychological factors and aggressive behavior will be complex. Neuropsychological factors must be considered in the context of mediating and moderating, precipitating and buffering variables from other ecological levels, e.g., family support. Even if perpetrator neuro-psychological factors are found to be reliably associated with aggression, it will still be necessary to demonstrate the extent to which different neuro-psychological factors are marker or are causal variables in aggressive behavior. Finally, since there has been a major societal and professional interest in the study of aggression within the family, several chapters focus on the possible neurological, neuropsychological and physiological aspects of family violence. Chapter 1, entitled *Biological Theories of Violence*, written by Adrian Raine and Angela Scerbo, provides a theoretical context for

understanding the role of biological factors in aggression This chapter begins with a discussion of conceptual issues and methodological problems that impede theory development and research in aggression Following this discussion the authors present theories that may lead to a better understanding of the ix x Preface neurological and cognitive components of aggression The presentation of each theory is followed by a discussion of theory related research
