**Encyclopedia of the Kennedys** Joseph M. Siracusa, 2012-09-07 An expansive reference that overviews John F. Kennedy's presidency, covering the people, places, and events that comprised the political landscape of the Kennedy era. The Kennedy family has played a leading role in the annals of American politics for over 100 years, no greater than when John F. Kennedy (JFK) became the 35th president of the United States. The celebrity surrounding the circumstances of his presidency, particularly his sudden assassination, made JFK the object of many enduring myths that he might have been one of the country's greatest leaders had he lived; that he would have kept the United States out of Vietnam; and that he was a martyr to right-wing assassins. *Encyclopedia of the Kennedys: The People and Events That Shaped America* is a three-volume reference set that provides an in-depth look at JFK's presidency, including his foreign and domestic policies, political allies and enemies, and major events and speeches. This A-Z encyclopedia also contains entries on the events of the 1960s that changed our nation forever, such as JFK's assassination and the Warren Commission report, the space program, and the My Lai Massacre, as well as the individuals who defined the time, such as writers Norman Mailer and James Baldwin, folk musicians Bob Dylan and Joan Baez, and activists Cesar Chavez and Martin Luther King Jr. Appendices provide a substantial archive of primary documents and identify officeholders during JFK's presidency, while an annotated bibliography supplies sources for additional research.

**Marketing the Moon** David Meerman Scott, Richard Jurek, 2014-02-28 One of the most successful public relations campaigns in history, featuring heroic astronauts, press-savvy rocket scientists, enthusiastic reporters, deep-pocketed defense contractors, and Tang. In July 1969, ninety-four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than *My Three Sons*? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In *Marketing the Moon*, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science-fiction magazine articles and appearances by Wernher von Braun on the *Tomorrowland* segments of the Disneyland prime-time television show, Americans were a receptive audience for NASA's pioneering brand journalism. Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features, rather than push an agenda. American astronauts who signed exclusive agreements with *Life* magazine became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the first camera on the moon; Sony cassette recorders and supplies of Tang were on board the capsule; and astronauts were equipped with the Exer-Genie personal exerciser. Everyone wanted a place on the

bandwagon Generously illustrated with vintage photographs artwork and advertisements many never published before Marketing the Moon shows that when Neil Armstrong took that giant leap for mankind it was a triumph not just for American engineering and rocketry but for American marketing and public relations **Federal Communications Commission Reports** United States.
