Placing a strong emphasis on good evidence based assessment practice Sally Holland has also for this new edition included original research evidence from a wide range of up to date research studies which are relevant to today's practice and which aim to promote a critical and reflective approach to the assessment process The book is divided into three parts Part 1 explores different approaches to assessment work outlining policy changes and their implications for working with children and their families Part 2 studies those involved in child and family assessments children and their parents and the relationship between the assessors and the assessed Part 3 a more practical guide outlines the actual process of an assessment illustrated by case studies focusing on planning assessment methods analysis reporting and critical evaluation Accessibly relating theory and research to actual practice through the use of case studies exercises and suggestions for good practice and further reading this book has a student friendly structure It will be an invaluable resource for practitioners and academics across the field of social welfare particularly for those embarking on or already involved in child and family assessment
