and emotional development is a result of individual context interactions. Particularly socialization perspectives regard parenting as the primary factor that shapes child and adolescent development to a large extent. Meanwhile the ecological perspective highlights the bi-directional nature of interactions between children and parents by which they affect each other. Parenting can be parents' active socialization actions that influence their children's development i.e. parent effect; it can also be parents' reactions to their children's social and emotional functioning i.e. child effect.
