natural science management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth's atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change, population growth and rapid development in many water stressed regions of the world. The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008, a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa, notable for increasing levels of aridity and more erratic rainfall patterns. This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation. The focus is on the Water-Energy-Food nexus, a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water, energy and food as resources.

Carving out a Future Brian Belcher, Bruce M Campbell, Anthony Cunningham, 2013-06-17

Very little has yet been written about the cultural or economic contributions of woodcarving to people's livelihoods or the consequences of felling hardwood and softwood trees for the international woodcarving trade. *Carving Out a Future* is the first examination of this trade and its critical links to rural livelihoods, biodiversity conservation, forestry and the international trade regime. A range of case studies from Australia, Bali, India, Africa and Mexico provides a lens for examining the critical issues relating to the significant impacts of woodcarving on forests, conservation efforts, the need to promote sustainable rural livelihoods and efforts to promote trade so that skilled artisans in developing countries get a fair economic return. *Livelihoods, Carving and Conservation: Global Overview*, *The Case of Woodcarving in Kenya*, *Drums and Hornbills: Sculpture and Identity*, *Carving Wood in Southern Zimbabwe*, *The Kiaat Woodcrafters of Bushbuckridge*, *South Africa*, *Carvers' Conservation and Certification in India*, *Colour, Sustainability and Market Sense in Bali*, *Aboriginal Woodcarvers in Australia*, *Bursera*, *Woodcarving in Oaxaca*, *Mexico*, *Linaloe Wood Handicrafts*, *Learning from a Comparison of Cases*, *Carving Sustainability and Scarcity*, *Certification of Woodcarving*, *Planning for Woodcarving in the 21st Century*.
