Controlling Territory, Controlling Voters Michael Wahman, 2023-10-14 Violence in election campaigns is common across the African continent and beyond According to some estimations most African elections contain some degree of violence and most of this violence happens before elections during the campaign While campaign violence is a common problem it affects citizens differently across localities When violence and intimidation become an integral part of election campaigns in a locality they become tools of sub national authoritarianism that may effectively dismantle local democracy This book focuses on the political geography of election violence in Africa building on one important observation elections in many African countries are highly regional and the support for political parties are rarely nationalized Wahman argues that in such environments campaign violence becomes an important tool used by parties to control and regulate access to space Building on a wealth of data and extensive fieldwork in Zambia and Malawi the author uses a combination of electoral geography analysis constituency level election violence data collected from local election monitors focus group interviews archival material and individual level survey data to show how campaign violence in both countries is used as a territorial tool predominantly within party strongholds

Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization the political impact of natural resources the dynamics and consequences of conflict and the nature of the continent s engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the

broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The series focuses on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest General Editors Nic Cheeseman Peace Medie and Ricardo Soares de Oliveira *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Inequality**

Around the World Deric Shannon,2025 This authoritative two volume set explores and explains the extent and roots of socioeconomic inequality both within and across nations Both volumes focus on examining factors that shape the dimensions and impact of those disparities **Resilience and Sustainability in Urban Africa** Innocent Chirisa,Andrew

Chigudu,2021-08-02 Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development This book presents a resilience framework for sustainable cities and towns in Africa The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development Aspects of places people and process are central to the concept of urban resilience and sustainable urban growth It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond In history disasters have adversely affected nations across the world inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements The significance of urban planning and design in the growth and development of sustainable urban centres is well documented Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle This has been accompanied by problems such as overpopulation overcrowding shortages of resources and the growth of slum settlements There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure **Climate Change, Hazards and Adaptation Options** Walter Leal

Filho,Gustavo J. Nagy,Marco Borga,Pastor David Chávez Muñoz,Artur Magnuszewski,2020-02-14 This book addresses the issue of climate change risks and hazards holistically Climate change adaptation aims at managing climate risks and hazards to an acceptable level taking advantage of any positive opportunities that may arise At the same time developing suitable responses to hazards for communities and users of climate services is important in ensuring the success of adaptation measures But despite this knowledge about adaptation options including possible actions that can be implemented to improve adaptation and reduce the impacts of climate change hazards is still limited Addressing this need the book presents studies and research findings and offers a catalogue of potential adaptation options that can be explored It also includes case studies providing illustrative and inspiring examples of how we can adapt to a changing climate Smart Buildings and

Cities with Remote Sensing and GIS Shiv Mohan, Navneet Munoth, Neha Sharma, 2025-03-31 The built environment is undergoing a profound transformation driven by the integration of cutting edge geospatial technologies Smart Buildings and Cities with Remote Sensing and GIS serves as a comprehensive guide to navigating this transformation and bridges the gap between traditional architectural and planning practices and the innovative possibilities of remote sensing RS and geographic information systems GIS The book demonstrates how architects planners and decisionmakers can use GIS and RS to design smarter context aware and eco friendly urban spaces It explores innovative approaches for architecture focusing on geospatial site analysis net zero energy building designs heritage preservation innovative virtual campus planning methodologies and even futuristic concepts like habitat design on the lunar surface Key features Brings together contemporary geospatial technologies and their applications to address the challenges and opportunities in designing smart buildings and cities Provides actionable solutions for professionals researchers and policymakers Includes global contributions that provide diverse perspectives on smart city and building applications Highlights how geospatial data driven insights can revolutionize decisionmaking processes in urban planning and building design The work is designed for postgraduate students and researchers in the departments of architecture planning and geomatics geoinformatics software engineering
