The Rhodesian Air Force in Zimbabwe's War of Liberation, 1966-1980 Darlington Mutanda,2016-11-10 This book evaluates the development of the Rhodesian Air Force during the Second Chimurenga or Bush War 1966 1980 Airpower in irregular conflict is effective at the tactical level because guerrilla warfare is not a purely military conflict The Rhodesian Air Force was deployed in a war winning versus a supporting role as a result of the shortage of manpower to deal with insurgency and almost all units of the Rhodesian Security Forces depended on its tactical effectiveness Technical challenges faced by the Air Force combined with the rate of guerrilla infiltration and the misuse of airpower to bomb guerrilla bases in neighboring countries largely negated the success of airpower

**Reimagining God and Resacralisation** Alexa Blonner, 2019-05-14 This book shows that widespread resacralisation has been taking place which is producing new ways of perceiving God and the divine The last century has

seen unmistakable changes in religious practices and the concept of spirituality right across the world There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism but this process of secularisation has yet to occur as predicted The book begins by contrasting theories of secularisation and resacralisation Throughout the book conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories reimagining God's nature substance and location reimagining human value and purpose and reimagining modes of redemption Finally the book considers how these threads are moving in various different directions and what the religious future might hold This is a bold examination of contemporary spirituality that will appeal to academics and scholars of religious studies new religious movements and the sociology of religion

Africa's Shadow Rise Doctor Padraig Carmody, Peter Kragelund, Ricardo Reboredo, 2020-09-17 For years economists have spoken of Africa rising and despite the global financial crisis Africa continues to host some of the fastest growing economies in the world Africa's Shadow Rise however argues that the continent's apparent economic rise is essentially a mirage driven by developments elsewhere most particularly the expansion in China's economy While many African countries have experienced high rates of growth much of this growth may prove to be unsustainable and has contributed to environmental destruction and worsening inequality across the continent Similarly new economic relationships have produced new forms of dependency as African nations increasingly find themselves tied to the fortunes of China and other emerging powers Drawing on in depth fieldwork in southern Africa Africa's Shadow Rise reveals how the shifting balance of global power is transforming Africa's economy and politics and what this means for the future of development efforts in the region *Africa*

*and China* Aleksandra W. **China** Richard B. Harris, 2014-12-18 Very little is known about the issue of wildlife conservation within China Even China specialists get a meager ration of stories about pandas giving birth in zoos or poachers in some remote setting being apprehended But what does the future hold for China's wildlife In this thoughtful work the leading U S expert on wildlife projects in Western China presents a multi faceted assessment of the topic Richard B Harris draws on twenty years of

experience working in China and incorporates perspectives ranging from biology through Chinese history and tradition to interpret wildlife conservation issues in a cultural context In non technical language Harris shows that particularly in its vast western sections where most species of wildlife still have a chance to survive China has adopted a strongly preservationist hands off approach to wildlife without confronting the larger and more difficult problem of habitat loss This policy treats wildlife conservation as a strictly technical problem and thus prioritizes captive breeding to meet the demand for animal products while ignoring the manifold cultural social and economic dimensions that truly dictate how wild animals will fare in their interaction with the physical and human environments The author concludes that any successes this policy achieves will be temporary
