organizations and events In this book global sport business is viewed from a number of different perspectives including a value chain approach to describing the sport industry the ever increasing impact of the international media on sport business how globalization influences the style of sport management how social capital can be generated through sport business and the emergence of social sport business Overall the different contributors to the book reflect on how sport s global and as such commercial attractiveness can and often will impact locally on communities of people and individuals This book was published as a special issue of Sport in Society *Bureaucracy, Law and Dystopia in the United Kingdom's Asylum System* John R. Kararach,2014-10-28 The author investigates the agenda for transformation in contemporary African development studies policy studies strategic studies international relations and economic diplomacy With a focus on the capacity dimension he proposes critical policy and action oriented recommendations on how to overcome present and future emergencies in Africa **Poor Numbers** Morten Jerven,2013-01-24 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity Reliable statistics including estimates of economic growth rates and per capita income are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data The paucity of accurate statistics is not merely a technical problem it has a massive impact on the welfare of citizens in developing countries Where do these statistics originate How accurate are they Poor Numbers is the first analysis of the production and use of African economic development statistics Morten Jerven s

research shows how the statistical capacities of sub Saharan African economies have fallen into disarray The numbers substantially misstate the actual state of affairs As a result scarce resources are misapplied Development policy does not deliver the benefits expected Policymakers attempts to improve the lot of the citizenry are frustrated Donors have no accurate sense of the impact of the aid they supply Jerven s findings from sub Saharan Africa have far reaching implications for aid and development policy As Jerven notes the current catchphrase in the development community is evidence based policy and scholars are applying increasingly sophisticated econometric methods but no statistical techniques can substitute for partial and unreliable data

Post-Independence Development in Africa David Mhlanga,Emmanuel Ndhlovu,2023-07-11 The book Post Independence Development in Africa Decolonisation and Transformation Prospects revisits the development debates and development realities in Africa This is achieved by offering theoretical comments about post independence development in Africa and by providing historical details pertaining to the development approaches adopted in Africa immediately after independence in the 1960s and mid 70s Sitting at the intersection of two sets of scholarly literature namely literature on development and literature on development discourses and practices in Africa the book comprises a mixture of detailed sector specific accounts of the status of development on the continent The chapters in the book also contribute to clarifying how the two strands of literature intersect using several case studies across Africa

The Oxfam Poverty Report Kevin Watkins,1995 Fifty years ago the United Nations Charter proclaimed universal rights to shared prosperity peace and security How far has that vision of world citizenship been realised Despite advances in human welfare and technology there is today a growing polarisation between rich and poor One in four of the world s people live in absolute poverty unable to meet their basic needs armed conflict is affecting millions of people and the global environment is under threat Yet there is a failure of political will to address the silent emergency of poverty The Oxfam Poverty Report draws on Oxfam s experience of working in over 70 countries to examine the causes of poverty and conflict It identifies the structural forces which deny people their basic rights and gives a wide range of examples of the ways in which men and women are bringing about positive change at every level from the household to the international arena Oxfam believes that it is time to renew the UN vision of universal basic rights The Report concludes by proposing policy and institutional reforms which would transform international institutions and trading relations and calls for a new commitment to work together to eradicate poverty and bring sustainable peace and security for all the world s people

Issues in African Education A. Abdi,A. Cleghorn,2005-11-04 This book addresses major sociological issues in sub Saharan African education today Its fourteen contributors present a thoroughly African world view within a sociology of education theoretical framework allowing the reader to see where that

theory is relevant to the African context and where it is not. Several of the chapters bring a much needed cultural nuance and critical theoretical perspective to the issues at hand. The sixteen chapters thus aim to be of interest internationally to those who work in such fields as social and political foundations of comparative and international education and development studies including university professors, teacher educators, researchers, school teachers, tertiary education students, consultants and policy makers.

Gender, Unpaid Work and Care in India Ellina Samantroy, Subhalakshmi Nandi, 2022-05-09. This book explores the paradox of women's paid and unpaid work in India. It examines key themes including historical discourses, macroeconomic policies, employment trends, issues of tribal areas, public services and infrastructure, climate change and gendered migration and vulnerability of girl children. It highlights the play of gender norms, resource rights, identities and agency in women's work. Building on feminist theoretical frameworks and empirical analyses from microstudies, the volume offers fresh perspectives for research and policy on women's work in the Global South. A timely intervention, this multidisciplinary book will be useful to scholars and researchers of political economy, labour studies, women's gender studies, public policy, economics, development studies, sociology, South Asian studies and Global South studies. It will interest planners, policymakers, gender advocates, civil society organisations, human rights bodies and international organisations working towards ensuring gender equality and women's rights.
