Chemistry of the Climate System Detlev Möller, 2010-12-23 Climate change is one of the biggest challenges facing the modern world. The chemistry of the air within the framework of the climate system forms the main focus of this monograph. This problem-based approach to presenting global atmospheric processes begins with the chemical evolution of the climate system in order to evaluate the effects of changing air composition as well as possibilities for interference within these processes. Chemical interactions of the atmosphere with the biosphere and hydrosphere are treated in the sense of a multi-phase chemistry. From the perspective of a chemical climatology, the book offers an approach to solving the problem of climate change through chemistry.

Thermodynamics and Energy Conversion Principles Kaushal Dhawan, 2025-02-20 Thermodynamics and Energy Conversion Principles is a comprehensive guide to understanding how energy transforms from one form to another. Crafted by experts in physics, engineering, and related fields, this book covers both fundamental principles and practical applications of energy conversion.
