everyday work of specialist trainees registrars and consultants Topics covered in Volume 2 include *A Guide to the NHS* Tony White, 2018-05-08 To maximise the effectiveness of their work NHS employees need a clear understanding of the structures and systems of the organisation in which they work However this information can be widely spread hard to access and difficult to gain a working overview of and the pace of changes and initiatives can seem almost dizzying This book draws together a clear picture of the modern NHS from funding and governance to reports inquiries and overarching legislation The book is clear and easy to understand and crucially includes full references to provide a one stop point of access to the most detailed and up to date information available This book is essential reading for workers in the NHS at all levels including managers administrators and clinical professionals It is vital reading for managers and staff at commercial companies working with the NHS It will also be of interest to campaigners patient interest groups researchers and journalists with an interest in the NHS Specialty registrars and consultants can also find the information from the book and much more in *The Doctor's Handbook Parts 1 2* by the same author Rather than long narrative histories or complex explanations the author signposts readers to sources of further information making this book the quick guide so many of us need from the Foreword by Sir Ian Carruthers *How to Succeed at Revalidation* Peter Donnelly, Katie Webb, 2021-09-15 how to succeed at revalidation Doctors in the UK are required to provide evidence of their fitness to practice all doctors registered with the General Medical Council GMC need to revalidate to maintain their registration *How to Succeed at Revalidation* contains up to date information on the current regulatory framework and step by step guidance for the entire revalidation process Offering expert advice on how to undertake the process from the perspective of the appraisee the appraiser and the employer this practical quick reference guide covers each of the Good Medical Practice GMP domains Knowledge Skills and Performance Safety and Quality Communication Partnership and Team Work and Maintaining Trust Throughout the text numerous examples describe different models of appraisal and reflection identify activities that map to each domain and demonstrate how revalidation requirements can be achieved in the course of daily practice This much needed guide Covers regulatory processes in medicine and healthcare from both UK and international perspectives Reviews the background that led to the implementation of revalidation Discusses the new GMP requirements for all doctors in the UK Explores the possible future of revalidation *How to Succeed at Revalidation* is essential reading for all qualified and trainee doctors undergraduate and postgraduate learners tutors and trainers seeking to navigate the revalidation process in the UK *Failures in Health and Social Care* Neil Small, 2023-06-30 This thought provoking book examines breakdowns in the quality of health and social care over the past decade exploring governance failures and the challenges of achieving lasting change Failures in care have been manifest across many different settings Drawing on examples from care of older people and end of life care as well as from learning disabilities mental health maternity care and services for vulnerable children Neil Small shows that the same sorts of problems are evident across these settings and that they are occurring up to the

present day Discussing culture change alongside levels of funding and the impact of prevailing political and economic orthodoxies and through the lens of shifts of trust in society this book argues that the concept of culture must be cast much wider than organisational and professional cultures if change is to be secured This book engages with how to improve quality of care in the NHS and welfare systems more generally Its case examples are from the UK but the issues of governance culture change and shifts in the social contract that failures illuminate have an international relevance It is important reading for those with an interest in health social care political science and sociology

Not for Patching Frank Field,Andrew Forsey,2018-12-15 In his famous report of 1942 the economist and social reformer William Beveridge wrote that World War II was a revolutionary moment in the world s history and so a time for revolutions not for patching The Beveridge Report outlined the welfare state that Atlee s government would go on to implement after 1946 instituting for the first time a national system of benefits to protect all from the cradle to the grave Its crowning glory was the National Health Service established in 1948 which provided free medical care for all at the point of delivery Since then the welfare system has been patched beset by muddled thinking and short termism The British government spends more than 171 billion every year on welfare and yet since the Beveridge Report there has been no strategic review of the system compared to other areas of government and public policy which have been subject to frequent strategic reviews Reform of the welfare system need not mean dismantlement Frank Field and Andrew Forsey argue here but serious questions nonetheless must be asked about how the welfare state as we understand it can remain sustainable as the twenty first century progresses
