Strategic Management R. Maheshwari, Saurabh Agarwal, 2020-08-17 Strategic Management by R Maheshwari Saurabh Agarwal is a publication of the SBPD Publishing House Agra Strategic management is concerned with the processes by which management plans and co ordinates the use of business resources with the general objective of securing or maintaining competitive advantage This book provides the student with a general insight into the historical development of management practices and international business policies In particular this book reviews the developments and literature on corporate strategy and critically reviews the possibilities and limitations of management action in highly contested international markets This book targets to meet in full measure the requirements of students preparing for B B A B Com M Com M B A and other Professional Courses of various Indian Universities What makes this book an ideal choice is that great care has been taken to illustrate each point with suitable examples The basic motto of this book is to generate interest in the subject in the mind of the students and help them understand each and every concept Salient features of this book are as follows The motto of this book is to provide an easy and obvious understanding of the subject to the students Every best effort has been made to include the questions asked in various examinations in different years The subject matter of this book is prepared scientifically and analytically The volume of the book and the size of different points have been kept keeping in view to meet out the need for examinations

AI Factory Ramin Karim, Diego Galar, Uday Kumar, 2023-05-24 This book provides insights into how to approach and utilise data science tools technologies and methodologies related to artificial intelligence AI in industrial contexts It explains the essence of distributed computing and AI technologies and their interconnections It includes descriptions of various technology and methodology approaches and their purpose and benefits when developing AI solutions in industrial contexts In addition this book summarises experiences from AI technology deployment projects from several industrial sectors Features Presents a compendium of methodologies and technologies in industrial AI and digitalisation Illustrates the sensor to actuation approach showing the complete cycle which defines and differentiates AI and digitalisation Covers a broad range of academic and industrial issues within the field of asset management Discusses the impact of Industry 4 0 in other sectors Includes a dedicated chapter on real time case studies This book is aimed at researchers and professionals in industrial and software engineering network security AI and machine learning ML engineering managers operational and maintenance specialists asset managers and digital and AI manufacturing specialists

Digital Communication and Systems Mr. Rohit Manglik, 2024-01-24 Discusses modulation schemes error correction multiplexing and digital communication system performance analysis *Digital Spectral Analysis* Francis Castanié, 2013-02-04 Digital Spectral Analysis provides a single source that offers complete coverage of the spectral analysis domain This self contained work includes details on advanced topics that are usually presented in scattered sources throughout the literature The theoretical principles necessary for the understanding of spectral analysis are discussed in the first four chapters

fundamentals digital signal processing estimation in spectral analysis and time series models An entire chapter is devoted to the non parametric methods most widely used in industry High resolution methods are detailed in a further four chapters spectral analysis by stationary time series modeling minimum variance and subspace based estimators Finally advanced concepts are the core of the last four chapters spectral analysis of non stationary random signals space time adaptive processing irregularly sampled data processing particle filtering and tracking of varying sinusoids Suitable for students engineers working in industry and academics at any level this book provides a rare complete overview of the spectral analysis domain Corporate Strategy Richard L. Lynch,2006 A resource that guides students through the rational and emergent approaches to strategic management With references and 27 cases this work aims to ensure that students will actively learn the core topics and how to apply them in practice **Fundamentals of Automotive Technology**

Springer Handbook of Mechanical Engineering Karl-Heinrich Grote,Erik K. Antonsson,2009-01-13 This resource covers all areas of interest for the practicing engineer as well as for the student at various levels and educational institutions It features the work of authors from all over the world who have contributed their expertise and support the globally working engineer in finding a solution for today s mechanical engineering problems Each subject is discussed in detail and supported by numerous figures and tables **Laser Techniques Applied to Fluid Mechanics** Ronald J. Adrian,2000 In the tradition of its predecessors this volume comprises a selection of the best papers presented at the Ninth International Symposium on Applications of Laser Techniques to Fluid Mechanics held in Lisbon in July 2000 The papers reflect the state of the art in laser applications of laser techniques in fluid mechanics describing novel ideas for instrumentation instrumentation developments results of measurements of wall bounded flows free flows and flames and flow and combustion in engines The papers demonstrate the continuing interest in the development of an understanding of new methodologies and

implementation in terms of new instrumentation **Mining goes Digital** Christoph Mueller,Winfred Assibey-Bonsu,Ernest Baafi,Christoph Dauber,Chris Doran,Marek Jaszczuk,Oleg Nagovitsyn,2019-05-22 The conferences on Applications for Computers and Operations Research in the Minerals Industry APCOM initially focused on the optimization of geostatistics and resource estimation Several standard methods used in these fields were presented in the early days of APCOM While geostatistics remains an important part information technology has emerged and nowadays APCOM not only focuses on geostatistics and resource estimation but has broadened its horizon to Information and Communication Technology ICT in the mineral industry Mining Goes Digital is a collection of 90 high quality peer reviewed papers covering recent ICT related developments in Geostatistics and Resource Estimation Mine Planning Scheduling and Dispatch Mine Safety and Mine Operation Internet of Things Robotics Emerging Technologies Synergies from other industries General aspects of Digital Transformation in Mining Mining Goes Digital will be of interest to professionals and academics involved or interested in the

above mentioned areas **Key Factors of Combustion** Nikolai M. Rubtsov, 2016-11-13 This book summarizes the main advances in the mechanisms of combustion processes It focuses on the analysis of kinetic mechanisms of gas combustion processes and experimental investigation into the interrelation of kinetics and gas dynamics in gas combustion The book is complimentary to the one previously published The Modes of Gaseous Combustion **Principles of Combustion** Allan T. Kirkpatrick, Kenneth K. Kuo, 2024-10-08 The new edition of a classic textbook on combustion principles and processes covering the latest developments in fuels and applications in a student friendly format Principles of Combustion provides clear and authoritative coverage of chemically reacting flow systems Detailed and accessible chapters cover key combustion topics such as chemical kinetics reaction mechanisms laminar flames droplet evaporation and burning and turbulent reacting flows Numerous figures end of chapter problems extensive reference materials and examples of specific combustion applications are integrated throughout the text Newly revised and expanded Principles of Combustion makes it easier for students to absorb and master each concept covered by presenting content through smaller bite sized chapters Two entirely new chapters on turbulent reacting flows and solid fuel combustion are accompanied by additional coverage of low carbon fuels such as hydrogen natural gas and renewable fuels This new edition contains a wealth of new homework problems new application examples up to date references and access to a new companion website with MATLAB files that students can use to run different combustion cases Fully updated to meet the needs of today s students and instructors Principles of Combustion Provides problem solving techniques that draw from thermodynamics fluid mechanics and chemistry Addresses contemporary topics such as zero carbon combustion turbulent combustion and sustainable fuels Discusses the role of combustion emissions in climate change and the need for reducing reliance on carbon based fossil fuels Covers a wide range of combustion application areas including internal combustion engines industrial heating and materials processing Containing both introductory and advanced material on various combustion topics Principles of Combustion Third Edition is an essential textbook for upper level undergraduate and graduate courses on combustion combustion theory and combustion processes It is also a valuable reference for combustion engineers and scientists wanting to better understand a particular combustion problem *Digital Communications* Bernard Sklar, 2021-01-27 The Best Selling Introduction to Digital Communications Thoroughly Revised and Updated for OFDM MIMO LTE and More With remarkable clarity Drs Bernard Sklar and fred harris introduce every digital communication technology at the heart of today s wireless and Internet revolutions with completely new chapters on synchronization OFDM and MIMO Building on the field s classic best selling introduction the authors provide a unified structure and context for helping students and professional engineers understand each technology without sacrificing mathematical precision They illuminate the big picture and details of modulation coding and signal processing tracing signals and processing steps from information source through sink Throughout readers will find numeric examples step by step implementation guidance and diagrams that place key concepts in clear context

Understand signals spectra modulation demodulation detection communication links system link budgets synchronization fading and other key concepts Apply channel coding techniques including advanced turbo coding and LDPC Explore multiplexing multiple access and spread spectrum concepts and techniques Learn about source coding amplitude quantizing differential PCM and adaptive prediction Discover the essentials and applications of synchronization OFDM and MIMO technology More than ever this is an ideal resource for practicing electrical engineers and students who want a practical accessible introduction to modern digital communications This Third Edition includes online access to additional examples and material on the book s website

Sustainable Education and Development—Clean Energy Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy

intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019. However, the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3. International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019, a 23.6% decrease from 2018. This decline occurred even before the onset of the COVID-19 pandemic. Over a longer five-year moving average, average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019. Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020, small island developing States, least developed countries, and landlocked developing countries have lagged behind. It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020. The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research discussions and its dissemination. Researchers from research institutions, academicians, postgraduate students, politicians, and industry representatives will be the primary audience for the conference proceedings.
