Proceedings of International Conference on Computer Science and Information Technology Srikanta Patnaik, Xiaolong Li, 2014-01-23 The main objective of CSAIT 2013 is to provide a forum for researchers, educators, engineers and government officials involved in the general areas of Computational Sciences and Information Technology to disseminate their latest research results and exchange views on the future research directions of these fields. A medium like this provides an opportunity to the academicians and industrial professionals to exchange and integrate practice of computer science application of the academic ideas improve the academic depth. The in depth discussions on the subject provide an international communication platform for educational technology and scientific research for the world's universities, engineering field experts, professionals and business executives. Applied Network Security Monitoring Chris Sanders, Jason Smith, 2013-11-26 Applied Network Security Monitoring is the essential guide to becoming an NSM analyst.

from the ground up This book takes a fundamental approach to NSM complete with dozens of real world examples that teach you the key concepts of NSM Network security monitoring is based on the principle that prevention eventually fails In the current threat landscape no matter how much you try motivated attackers will eventually find their way into your network At that point it is your ability to detect and respond to that intrusion that can be the difference between a small incident and a major disaster The book follows the three stages of the NSM cycle collection detection and analysis As you progress through each section you will have access to insights from seasoned NSM professionals while being introduced to relevant practical scenarios complete with sample data If you ve never performed NSM analysis Applied Network Security Monitoring will give you an adequate grasp on the core concepts needed to become an effective analyst If you are already a practicing analyst this book will allow you to grow your analytic technique to make you more effective at your job Discusses the proper methods for data collection and teaches you how to become a skilled NSM analyst Provides thorough hands on coverage of Snort Suricata Bro IDS SiLK and Argus Loaded with practical examples containing real PCAP files you can replay and uses Security Onion for all its lab examples Companion website includes up to date blogs from the authors about the latest developments in NSM

Risco Martín,2018-09-03 In areas such as military security aerospace and disaster management the need for performance optimization and interoperability among heterogeneous systems is increasingly important Model driven engineering a paradigm in which the model becomes the actual software offers a promising approach toward systems of

systems SoS engineering However model driven engineering has largely been unachieved in complex dynamical systems and netcentric SoS partly because modeling and simulation M S frameworks are stove piped and not designed for SoS composability Addressing this gap Netcentric System of Systems Engineering with DEVS Unified Process presents a methodology for realizing the model driven engineering vision and netcentric SoS using DEVS Unified Process DUNIP The authors draw on their experience with Discrete Event Systems Specification DEVS formalism System Entity Structure SES theory and applying model driven engineering in the context of a netcentric SoS They describe formal model driven engineering methods for netcentric M S using standards based approaches to develop and test complex dynamic models with DUNIP The book is organized into five sections Section I introduces undergraduate students and novices to the world of DEVS It covers systems and SoS M S as well as DEVS formalism software modeling language and DUNIP It also assesses DUNIP with the requirements of the Department of Defense s DoD Open Unified Technical Framework OpenUTF for netcentric Test and Evaluation T E Section II delves into M S based systems engineering for graduate students advanced practitioners and industry professionals It provides methodologies to apply M S principles to SoS design and reviews the development of executable architectures based on a framework such as the Department of Defense Architecture Framework DoDAF It also describes an approach for building netcentric knowledge based contingency driven systems Section III guides graduate students advanced DEVS users and industry professionals who are interested in building DEVS virtual machines and netcentric SoS It discusses modeling standardization the deployment of models and simulators in a netcentric environment event driven architectures and more Section IV explores real world case studies that realize many of the concepts defined in the previous chapters Section V outlines the next steps and looks at how the modeling of netcentric complex adaptive systems can be attempted using DEVS concepts It touches on the boundaries of DEVS formalism and the future work needed to utilize advanced concepts like weak and strong emergence self organization scale free systems run time modularity and event interoperability This groundbreaking work details how DUNIP offers a well structured platform independent methodology for the modeling and simulation of netcentric system of systems
