Conclusion:

Footnote to Youth could be said to portray the philosophy of realism. Realism in literature attempts to describe life without any kind of idealization or romantic notions wherein human life and social conditions are presented in its actual state [20]. Footnote strictly adheres on the fidelity of life and to the actuality of its representation in the literature. The setting, the theme and the characters are all realistic and does not exaggerate nor flaunts hyperbolic events in order to bridge the imagination of readers to the meaning of the story.

As to the symbolisms used in the story, the recurring cycle of Youth, Love and Life are emphasized. In the story, it happened to Dodong and recurred to Blas. Villa artistically stressed this cycle twice in the story. Youth is characterized in the story as the time of fancy, immaturity, vigor, aggression, and freedom. Youth also possess this uncanny habit of being reckless and irresponsible in their actions. Most of their doings are mandated by the drive to be always happy and free. However, their irresponsible merriment often constitutes with thoughtless means of actions leading to unfavorable results.

Love, as depicted in the story, can be either the most powerful motivation for growth or the most destructive force in your life. Youth are swayed with the onset of the enormous intensity of love. Dodong, in all his youthful vigor, failed to grasp the real essence of all its deeper worth. He only skims its shallow impression. Dodong is Villa's representation of a youth who had been waylaid by love. He had also served as a caution to those youth that love must not overpower wit and defy reasons. Life in Footnote to Youth is considered as an offspring of what comes after Youth and Love as stated in the lines, "Youth must triumph... now. Love must triumph... now. Afterwards... it will be life." It is Life that decides if Youth and Love had indeed succeeded. It is the outcome of Youth and Life that dictates the way of life. Villa had repeatedly emphasized the interconnection of Youth, Love and Life as a cyclical occurrence. They are the

Stephen Cole,2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of

the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers are likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of *Making Science Between Nature and Society* and with Jonathan R Cole *Social Stratification in Science*
