

What I Have Learned in This Course

I have learned a great deal in this course in relation to writing argumentative essays. There is much research involved, as well as objectivity to the position taken on a particular subject. These are, what I have learned, to be the two most important factors in the preparation for a paper. A writer must look at all possible arguments to support his or her position and make this very concise in the thesis statement in the first paragraph of the work. Similarly, one must look at any counterarguments that could arise from the thesis and explore these, as well.

All of this research must be done before the paper is written and woven in the supporting paragraphs in the piece. Of equal importance is taking a professional stance on the position/thesis and not an emotionally-driven stance. Using "I" statements is unacceptable, such as stating "I think that this is the best policy... ", for instance. Conclusions must come from extensive data review and demonstrate an extremely objective, yet clear stance on the subject from beginning to end.

All supporting paragraphs, after the introductory paragraph, that includes the thesis and main points that support it, should be filled with explanatory data to provide cause for the writer's position. After these arguments (supported by other research) are presented, then counterarguments should be noted. Having not only an literature review before beginning a paper, but, also, an outline with supporting arguments for the position and counter claims to the position with a response to them will make this portion of the argumentative paper easier and is extremely beneficial to the first draft of the work.

It is standard in a shorter essay to use four supporting paragraphs that all flow consistently from paragraph to paragraph and a conclusion that does not introduce new facts, but highlights the importance of the writer's previous information in this final paragraph. This final paragraph should not simply reiterate everything that is already written, but restate the main points and help further support the important stance taken on an issue. This "wrap-up" of the paper should leave no doubt in the reader's mind as to exactly what the writer intends the reader to absorb and the importance of the issue to that reader.

If further writing and research on the subject is planned, the final paragraph should indicate this. As many times, a short argumentative essay may evolve into a larger research project. After compiling the research, the outline, and then the first draft of the essay, a writer must then review the work and make any needed changes to the paper. Grammatical errors should be corrected, as well as any language that is unclear and may confuse the reader.

These essays must be very precise and to the point, so they may involve more than one revision to make a great final paper. I have, also, learned to ask for help involving feedback and constructive criticism.

What I Learned Essay:

What I Learned and What I Learnt Concetta A. Williams, Lydia Brown Magras, 2018-11-27 African Americans have viewed literacy as a key to upward mobility and freedom since before America's Reconstruction Era. However, African American academic achievement continues to be plagued by the ever-widening achievement gap, especially when their literacy skills are measured by standardized assessments that do not consider or value their culture, their experiences. It is common to think that this is an issue in K-12 settings. However, research and practical experiences suggest that African American students' achievement continues to be affected at the post-secondary level where they are likely to be taught by faculty who have limited experience with the nuances of Black English or African American Vernacular English (AAVE). This book steps into that gap by offering a resource for teaching speakers of AAVE at the post-secondary level. The St. Martin's Guide to Writing Rise B. Axelrod, Charles R. Cooper, 2010-01-26 This textbook provides instruction in college-level rhetoric and writing. It offers readings, a research manual, a handbook, and supports a range of approaches to teaching and learning, including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community and the workplace, field research, portfolios, oral presentations, essay exams, and ESL. It contains step-by-step guides to writing specific kinds of essays: remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons, and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research but also for evaluating sources, deciding whether to quote, paraphrase, or summarize, avoiding plagiarism, and documenting sources. The authors have included 39 readings by well-known authors and various fresh voices, including 12 students providing well-written examples of the different types of essays and papers that students might be asked to complete. **Axelrod & Cooper's Concise Guide to Writing** Rise B. Axelrod, Charles R. Cooper, 2011-10-19 Adapted from the best-selling St. Martin's Guide to Writing, Axelrod and Cooper's Concise Guide to Writing provides streamlined versions of the chapters covering six of the most commonly assigned genres in the first-year writing course: remembering events, writing profiles, explaining concepts, arguing a position, proposing a solution, and justifying an evaluation. The careful integration of well-chosen readings with guided writing instruction in these chapters is complemented by coverage of strategies for reading, writing, and research in brief but complete chapters at the end of the book. Read the preface. Assessment in the Second Language Writing Classroom Deborah Crusan, 2010-07 Assessment in the Second Language Writing Classroom is a teacher and prospective teacher-friendly book, uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom, and the sheltered composition classroom. In

addition teachers who experience a mixed population or teach cross cultural composition will find the book a valuable resource Other books have thoroughly covered the theoretical aspects of writing assessment but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment Further no book to date has included an in depth examination of the machine scoring of writing and its effects on second language writers Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so Her highly accessible thought provoking presentation of the conceptual and practical dimensions of writing assessment both for the classroom and on a larger scale promises to engage readers who have previously found the technical detail of other works on assessment off putting as well as those who have had no previous exposure to the study of assessment at all What They Don't Learn in School Jabari Mahiri,2004 Contributors to this book have illuminated the practices of literacy and learning in the lives of urban youth Their descriptions and assessments of these practices are anchored in perspectives of New Literacy Studies The ten studies explore a number of urban scenes in order to engage understand and present multiple youth identities attitudes activities representations and stories connected to a range of situated adaptive and voluntary uses of literacy The authors use a variety of conceptual and methodological approaches to explicate the various skills the distinct methods of production or composition the subjective and collective meanings the mutable and variegated texts and the dynamic contexts that urban youth utilize for expression affirmation and pleasure There is a response to each chapter by a major scholar in its area of focus Together these studies and responses contribute to a more comprehensive understanding of the pedagogies politics and possibilities of literacy and learning in and out of school Negotiating Academic Literacies Vivian Zamel,Ruth Spack,2012-08-06 Negotiating Academic Literacies Teaching and Learning Across Languages and Cultures is a cross over volume in the literature between first and second language literacy This anthology of articles brings together different voices from a range of publications and fields and unites them in pursuit of an understanding of how academic ways of knowing are acquired The editors preface the collection of readings with a conceptual framework that reconsiders the current debate about the nature of academic literacies In this volume the term academic literacies denotes multiple approaches to knowledge including reading and writing critically College classrooms have become sites where a number of languages and cultures intersect This is the case not only for students who are in the process of acquiring English but for all learners who find themselves in an academic situation that exposes them to a new set of expectations This book is a contribution to the effort to discover ways of supporting learning across languages and cultures and to transform views about what it means to teach and learn to read and write and to think and know Unique to this volume is the inclusion of the perspectives of writers as well as those of teachers and researchers Furthermore the contributors reveal their own struggles and accomplishments as they themselves have attempted to negotiate academic literacies The chronological ordering of articles provides a historical perspective demonstrating ways in which issues related to teaching and learning across cultures

have been addressed over time The readings have consistency in terms of quality depth and passion they raise important philosophical questions even as they consider practical classroom applications The editors provide a series of questions that enable the reader to engage in a generative and exciting process of reflection and inquiry This book is both a reference for teachers who work or plan to work with diverse learners and a text for graduate level courses primarily in bilingual and ESL studies composition studies English education and literacy studies

Freedom to Learn Bruce Macfarlane, 2016-08-12 The freedom of students to learn at university is being eroded by a performative culture that fails to respect their rights to engage and develop as autonomous adults Instead students are being restricted in how they learn when they learn and what they learn by the so called student engagement movement Compulsory attendance registers class contribution grading group project work and reflective learning exercises based on expectations of self disclosure and confession take little account of the rights of students or individual differences between them This new hidden university curriculum is intolerant of students who may prefer to learn informally are reticent shy or simply value their privacy Three forms of student performativity have arisen bodily participative and emotional which threaten the freedom to learn Key themes include A re imagining of student academic freedom The democratic student experience Challenging assumptions of the student engagement movement An examination of university policies and practices Freedom to Learn offers a radically new perspective on academic freedom from a student rights standpoint It

analyzes the effects of performative expectations on students drawing on the distinction between negative and positive rights to re frame student academic freedom It argues that students need to be thought of as scholars with rights and that the phrase student centred learning needs to be reclaimed to reflect its original intention to allow students to develop as persons Student rights to non indoctrination reticence in choosing how to learn and in being treated like an adult ought to be central to this process in fostering a democratic rather authoritarian culture of learning and teaching at university Written for an international readership this book will be of great interest to anyone involved in higher education policy and practice drawing on a wide range of historical and contemporary literature related to sociology philosophy and higher education studies
