Wounded by School Kirsten Olson, 2009 While reformers and policymakers focus on achievement gaps testing and accountability millions of students mentally and emotionally disengage from learning and many gifted teachers leave the field Ironically today s schooling is damaging the single most essential component to education the joy of learning How do we recognize the wounds caused by outdated schooling policies How do we heal them In her controversial new book education writer and critic Kirsten Olson brings to light the devastating consequences of an educational approach that values conformity over creativity flattens student s interests and dampens down differences among learners Drawing on deeply emotional stories Olson shows that current institutional structures do not produce the kinds of minds and thinking that society really needs Instead the system tends to shame disable and bore many learners Most importantly she presents the experiences of wounded learners who have healed and shows what teachers parents and students can do right now to help themselves stay healthy We need to replace industrial schooling with more genuinely caring and humane ways of teaching and Olson clearly shows us why and how to do it Ron Miller Editor Education Revolution magazine **Wounded by School** is not merely a technical repair manual for our broken schools it is a guide to how to revive their purpose their spirit and their hope David H Rose Founding Director CAST the Center for Applied Special Technology Kirsten Olson s book is refreshingly unlike the general run of sludge I associate with writing about pedagogy I can t imagine anyone not being better for reading this book Twice John Taylor Gatto author of *Dumbing Us Down* I invite anyone invested in American public schools and I hope that s all of us to read this book and join hands in building schools that help every student not only heal but thrive Terry Chadsey Associate Director Center for Courage Renewal Olson questions the appropriateness of school structures norms rituals and routines that were set in place cast in stone more than a century ago that now seem dangerously anachronistic and alienating And she asks us to consider the ways in which we might create more cherishing and inclusive school cultures that would incite learning and love From the Foreword by Sara Lawrence Lightfoot Harvard Graduate School of Education

Kim,2014-07-11 In recent years a growing field of empathy studies has started to emerge from several academic disciplines including neuroscience social psychology and philosophy Because literature plays a central role

in discussions of empathy across disciplines reconsidering how literature relates to feeling with others is key to rethinking empathy conceptually This collection challenges common understandings of empathy asking readers to question what it is how it works and who is capable of performing it The authors reveal the exciting research on empathy that is currently emerging from literary studies while also making productive connections to other areas of study such as psychology and neurobiology While literature has been central to discussions of empathy in divergent disciplines the ways in which literature is often thought to relate to empathy can be simplistic and or problematic The basic yet popular postulation that reading literature necessarily produces empathy and pro social moral behavior greatly underestimates the complexity of reading literature empathy morality and society Even if empathy were a simple neurological process we would still have to differentiate the many possible kinds of empathy in relation to different forms of art All the complexities of literary and cultural studies have still to be brought to bear to truly understand the dynamics of literature and empathy **Princeton**
