*Indicators of Precollege Education in Science and Mathematics* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Indicators of Precollege Science and Mathematics Education, 1985-01-01 Many studies point to the inadequacy of precollege education in the United States How can it be improved The development of effective policy requires information on the condition of education and the ability to measure change This book lays out a framework for an efficient monitoring system Key variables include teacher quality and quantity course content instructional time and enrollment and student achievement *Annual Report of the Regents of the University of the State of New York* University of the State of New York, University of the State of New York. Board of Regents, 1890 On the Same Track Carol Corbett Burris, 2015-03-17 A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms What would happen if a school eliminated the tracks that rank students based on their perceived intellectual abilities Would low achieving students fall behind and become frustrated Would their higher achieving peers suffer from a watered down curriculum Or is tracking itself the problem A growing body of research shows that tracking doesn't increase learning for the minority and low income students who are overrepresented in low track classrooms This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education As a principal at a New York high school Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all She helped lead a bold plan to eliminate tracking from her school and the results couldn't have been further from the doom and gloom scenarios of tracking proponents Instead there was a dramatic improvement in the achievement of all students across racial and socioeconomic divisions and a near elimination of the achievement gap Today due to those efforts International Baccalaureate English is the twelfth grade curriculum for South Side students and all students take the same challenging courses together to prepare them for college In *On the Same Track* Burris draws on her own experience on the experiences of other schools and on the latest research to make an impassioned case for detracking Not only does the practice of tracking fail to benefit lower tracked students as Burris shows but it also results in the resegregation of classrooms Furthermore she argues that many of today's popular reforms emanate from the same sort and select mentality that reinforces social stratification based on race and class *On the Same Track* is a rousing controversial and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential *Annual Report of the Regents* University of the State of New York, 1889 No 104 117 contain also the Regents bulletins **Meeting the Challenges to Measurement in an Era of Accountability** Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators

based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

*Lessons in Integration* Erica Frankenberg, Gary Orfield, 2007-11-29

Segregation is deepening in American schools as courts terminate desegregation plans residential segregation spreads the proportion of whites in the population falls and successful efforts to use choice for desegregation such as magnet schools are replaced by choice plans with no civil rights requirements Based on the fruits of a collaboration between the Civil Rights Project at Harvard University and the Southern Poverty Law Center the essays presented in *Lessons in Integration: Realizing the Promise of Racial Diversity in American Schools* analyze five decades of experience with desegregation efforts in order to discover the factors accounting for successful educational experiences in an integrated setting Starting where much political activity and litigation as well as most previous scholarship leaves off this collection addresses the question of what to do and to avoid doing once classrooms are integrated in order to maximize the educational benefits of diversity for students from a wide array of backgrounds Rooted in substantive evidence that desegregation is a positive educational and social force that there were many successes as well as some failures in the desegregation movement and that students in segregated schools whether overwhelmingly minority or almost completely white are disadvantaged on some important educational and social dimensions when compared to their peers in well designed racially diverse schools this collection builds on but also goes beyond previous research in

taking account of increasing racial and ethnic diversity that distinguishes present day American society from the one addressed by the Brown decision a half century ago In a society with more than 40 percent nonwhite students and thousands of suburban communities facing racial change it is critical to learn the lessons of experience and research regarding the effective operation of racially diverse and inclusive schools Lessons in Integration will make a significant contribution to knowledge about how to make integration work and as such it will have a positive effect on educational practice while providing much needed assistance to increasingly beleaguered proponents of integrated public education **New York State Education** ,1929 *The Academy* ,1891 *Fellows in Arms: A 21st Century Teaching Saga* Aaron

Roston,2009-02-06 This story begins as war stories often do as a call to arms In the wake of 9 11 Aaron Roston joined the New York City Teaching Fellows program created to parachute elite career changers into the schools euphemistically known as hard to staff Thousands answered the call few were chosen 25 members of Roston s class began their service in 2002 by the summer of 2005 only 7 remained in the system FELLOWS IN ARMS is the view from the sharp end of educational reform and dramatizes what the term teacher accountability really means The story of idealistic teachers in urban school settings has become cliché But FELLOWS IN ARMS is different It uses memoir history and reportage to create a narrative that finds humor and drama in equal measure No dry policy book this is the maddening sometimes tragic often comic saga of what ensued when the school bell sounded *High Points in the Work of the High Schools of New York City* New York (N.Y.). **The Algebra Conspiracy** Michael Wiener,2000-09 The Algebra Conspiracy is an irreverent radical politically incorrect passionate challenge to the increasingly popular program of the educational establishment which requires every student to take two to four years of college preparatory mathematics to earn a high school diploma These well meaning but misguided people are placing every secondary school student into Algebra Geometry and Trigonometry classes that they may not want that they may not need to fulfill requirements for future employment or that they may not be academically equipped to handle This means for instance that a youngster who has trouble adding common fractions computing with percents or even making change on a ten dollar purchase will nevertheless be required to pass Algebra and Geometry In many school districts this is already creating an academic nightmare as more and more math teachers are faced with the Hobson s choice of either failing many of their students who simply cannot handle Algebra and Geometry or handing out numerous gift D s or severely watering down the college prep mathematics curriculum so more students can pass the classes The author takes the controversial view that the Age of Technology notwithstanding a large percentage of today s secondary school youngsters could if allowed live their entire adult working lives very comfortably without ever being forced to set foot in Algebra and Geometry classrooms There are many other classes that these youngsters should be taking such as cultural or practical arts electives instead of wasting their time in college prep math classes *Report of the Regents* University of the State of New
