Thermochemical Conversion of Biomass Feedstock and Solid Waste into Biofuels Yanjun Hu,Nan Zhou,Shurong Wang,Jianhua Yan,2025-05-09 Thermochemical Conversion of Biomass Feedstock and Solid Waste into Biofuels Production and Pollutant Control offers a comprehensive overview of the state of the art in biofuel production with a special focus on pollutants control which is both necessary and beneficial for the target audience and the development of this research field Biofuel is currently a major trend due to the existing environmental crises and global energy challenges Developing sustainable biofuels from biomass feedstock and solid waste along with minimizing the formation of pollutants during the conversion processes are currently of significant academic and industrial importance drawing widespread attention Novel

processes reactions and catalysts are being rapidly developed and compiling this information is invaluable for keeping the audience informed and up to date In addition while research on the formation and transformation of pollutants such as heavy metals chlorine nitrogen and sulfur species are often conducted by environmental scientists and engineers it is less familiar to bioenergy researchers This book aims to bridge the gap between relevant disciplines and presents a comprehensive overview of the entire research field Provides a state of the art overview of thermochemical conversion processes catalytic upgrading reactions and catalysts related to biofuel production from biomass feedstock and solid waste Evaluates the latest processes reactions and catalysts related to thermochemical conversion of emerging solid waste such as plastic waste Introduces the formation and control mechanisms of organic pollutants during the conversion and upgrading processes from the perspective of environmental scientists and engineers

Computer Networks Piotr Gaj, Andrzej Kwiecień, Piotr Stera, 2015-05-27 This book constitutes the thoroughly refereed proceedings of the 22st International Conference on Computer Networks CN 2015 held in Brun w Poland in June 2015 The 42 revised full papers presented were carefully reviewed and selected from 79 submissions The papers in these proceedings cover the following topics computer networks distributed computer systems communications and teleinformatics

Yang, 2015-04-14 This book presents the proceedings of the International Computer Symposium 2014 ICS 2014 held at Tunghai University Taichung Taiwan in December ICS is a biennial symposium founded in 1973 and offers a platform for researchers educators and professionals to exchange their discoveries and practices to share research experiences and to discuss potential new trends in the ICT industry Topics covered in the ICS 2014 workshops include algorithms and computation theory artificial intelligence and fuzzy systems computer architecture embedded systems SoC and VLSI EDA cryptography and information security databases data mining big data and information retrieval mobile computing wireless communications and vehicular technologies software engineering and programming languages healthcare and bioinformatics among others There was also a workshop on information technology innovation industrial application and the Internet of Things ICS is one of Taiwan s most prestigious international IT symposiums and this book will be of interest to all those involved in the world of information technology

Discovery and Development of Neuroprotective Agents from Natural Products Goutam Brahmachari, 2017-05-18 Discovery and Development of Neuroprotective Agents from Natural Products draws together global research on medicinal agents from natural sources as starting points for the design of neuroprotective drugs From the prediction of promising leads and identification of active agents to the extraction of complex molecules the book explores a range of important topics to support the development of safer more economical therapeutics for these increasingly prevalent diseases Beginning with an overview of current developments in the field the book goes on to explore the identification extraction and phytochemistry of such neuroprotective agents as antioxidants biophenols and naturally occurring anti inflammatory steroid analogues Specific

natural sources of bioactive agents are reviewed and the development of these agents into therapeutics for a number of specific neurological disorders including Alzheimer's disease, Parkinson's disease and ischemic brain stroke are discussed. Combining the expertise of specialists from around the world, this in the Natural Products Drug Discovery series aims to support and encourage researchers in the investigation of natural sources as starting points for the development of standardized safe and effective neuroprotective drugs. Features chapters written by active researchers and leading global experts deeply engaged in the research field of natural product chemistry for drug discovery. Includes comprehensive coverage of cutting edge research advances in the design of drugs from natural products targeted at different kinds of neurodegenerative diseases. Offers a practical review of identification, isolation and extraction techniques to support medicinal chemists in the lab.

Handbook of Nanofillers Shadpour Mallakpour, Chaudhery Mustansar Hussain, 2025-08-05. This handbook presents the basic concepts of nanofillers, their types, unique properties including their structure, surface area, properties, real time applications. The book discusses basics of nanofillers, their types, their structures and properties as well as several applications. The chapters in this book cover latest developments, applications in the food industry, drug delivery, tissue technology, biosensors, electrically conductive polymers and insulators, green catalysis and environmental remediation. The contents of these books will be useful to researchers, industry practitioners and academics across disciplines of materials science, chemistry, biomedicine, industrial engineering and chemical engineering.

Futuristic Trends in Network and Communication Technologies Pradeep Kumar Singh, Gennady Veselov, Anton Pljonkin, Yugal Kumar, Marcin Paprzycki, Yuri Zachinyaev, 2021-03-30. This two volume set CCIS 1395, 1396 constitutes the refereed proceedings of the Third International Conference on Futuristic Trends in Network and Communication Technologies (FTNCT 2020) held in Taganrog, Russia, in October 2020. The 80 revised papers presented were carefully reviewed and selected from 291 submissions. The prime aim of the conference is to invite researchers from different domains of network and communication technologies to a single platform to showcase their research ideas. The selected papers are organized in topical sections on communication technologies, security and privacy, futuristic computing technologies, network and computing technologies, wireless networks and Internet of Things (IoT).

Methods and Applications of Sample Size Calculation and Recalculation in Clinical Trials Meinhard Kieser, 2020-11-19. This book provides an extensive overview of the principles and methods of sample size calculation and recalculation in clinical trials. Appropriate calculation of the required sample size is crucial for the success of clinical trials. At the same time, a sample size that is too small or too large is problematic due to ethical, scientific and economic reasons. Therefore, state of the art methods are required when planning clinical trials. Part I describes a general framework for deriving sample size calculation procedures. This enables an understanding of the common principles underlying the numerous methods presented in the following chapters. Part II addresses the fixed sample size design where the required sample size is determined in the planning stage and is not changed afterwards. It covers sample size calculation

methods for superiority non inferiority and equivalence trials as well as comparisons between two and more than two groups A wide range of further topics is discussed including sample size calculation for multiple comparisons safety assessment and multi regional trials There is often some uncertainty about the assumptions to be made when calculating the sample size upfront Part III presents methods that allow to modify the initially specified sample size based on new information that becomes available during the ongoing trial Blinded sample size recalculation procedures for internal pilot study designs are considered as well as methods for sample size reassessment in adaptive designs that use unblinded data from interim analyses The application is illustrated using numerous clinical trial examples and software code implementing the methods is provided The book offers theoretical background and practical advice for biostatisticians and clinicians from the pharmaceutical industry and academia who are involved in clinical trials Covering basic as well as more advanced and recently developed methods it is suitable for beginners experienced applied statisticians and practitioners To gain maximum benefit readers should be familiar with introductory statistics The content of this book has been successfully used for courses on the topic
