**Breaking the Colonial "Contract"** Everisto Benyera, 2020-05-22 The book exposes various mechanisms and methods by which covert colonial mechanisms are employed to perpetuate colonialism especially in Africa Less overt and more covert perpetuation of colonialism is done through the use of networks The main achievement of the initial phase of colonialism was the establishment of networks that are nefarious and omnipresent constituting distributed presence which allows for action at a distance As a result colonial subjects became willing participants in these processes unbeknownst to them which perpetuated their own colonialism The book exposes forms of colonialism where manufactured consent is used to perpetuate colonialism Trapped in this capitalist Western Christian language and moral world order without sovereignty African countries continuously sink deeper into the colonial quagmire

Muneri, 2019-11-29 Journalism Democracy and Human Rights in Zimbabwe provides an empirical analysis of Zimbabwe s ongoing state of affairs Bruce Mutsvairo and Cleophas T Muneri examine the intersection between journalism democracy and

human rights to historicize and critique past successes and failures that have played out in Zimbabwe's past as well as interrogate future challenges that await the nation's quest for democratization. **The Development of the Zimbabwe National Defense College, 2004-2012** Max John Chinyanganya, 2024-01-05. This book interrogates the often controversial civil-military relations debate in Zimbabwe. The study argues that theoretically Civil-Military Relations (CMR) describes the relationship between civil society as a whole and the military organization or organizations established to protect it. More narrowly, it describes the relationship between the civil authority of a given society and its military institutions. Studies of civil-military relations often rest on a normative assumption that civilian control of the military is preferable to military control of the state. This text demonstrates the complexity of the relationship between military institutions and civic societies, particularly in developing countries. The methodology employed here is a mixture of internationally recognised scholarly works supplemented by extensive interviews arising from international benchmarking with similar institutions worldwide. This coherent and accessible book brings the history of civil-military relations up to date, exploring a variety of perspectives and newly emerging practices in developing countries whose experience in this field is relatively new in both theory and practice.

*Higher Education in Ethiopia* Tebeje Molla, 2018-01-18. This book focuses on higher education in Ethiopia, analysing persisting inequalities and policy responses against the backdrop of the extensive expansion and reform that the system has experienced in recent years. Drawing on empirical data generated through interviews, policy reviews and focus group discussions, it explicates factors of structural inequality ranging from neoliberal policy orientations to repressive gender culture and geo-political peripherality. In a departure from conventional studies that consider policy a response to social problems, the book takes a critical perspective to show the constitutive role of policy and explains how the representation of the problem of social inequality undermines equity policy outcomes in Ethiopian higher education. Not only does the book problematise the framing of the problem of inequality in the system, it also outlines strategies for designing transformative equity instruments. In explaining structural factors of inequality and equity provisions, the book productively combines sociological concepts with historical accounts and political economy insights. Given the increased economic optimism associated with higher education in sub-Saharan Africa and the neoliberal ideals underpinning much of the

restructuring of the system in the region this is a timely and important contribution that sheds light on the social justice implications and consequences of such changes It offers fresh accounts of largely neglected qualitative cases of inequality making it a valuable read for students and researchers in the areas of Ethiopian education policy studies international and comparative education and international development

**Invasive Alien Species** Thammineni Pullaiah,Michael R. Ielmini,2021-04-21 Jedes Jahr breiten sich invasive gebietsfremde Arten in neue Kosysteme aus Die von den Eindringlingen verursachten Auswirkungen können sich in kürzester Zeit bemerkbar machen und verheerend sein Das Thema der invasiven gebietsfremden Arten ist umfassend komplex und auf verschiedenen Ebenen von globaler Bedeutung Verschieft wird es durch die Globalisierung der Weltwirtschaft und den zunehmenden Handel durch den die natürlichen Barrieren für den Transfer von Arten durchbrochen werden Invasive gebietsfremde Arten bedrohen die weltweite Nahrungsmittelversorgung

die Qualität und Verfügbarkeit von Trinkwasser sowie die Stromproduktion und -versorgung. Zusammen mit den zusätzlichen Risiken durch den globalen Klimawandel ist die weltweite Homogenisierung von Pflanzen, Tieren und Mikroben ein wesentlicher Faktor für den sich verschlechternden Gesundheitszustand der Ökosysteme und die nachlassenden Ökosystemdienstleistungen überall auf der Welt. Um dieser Entwicklung entgegenzuwirken, besteht die dringende Notwendigkeit einer einheitlichen Ausrichtung von Regierungen, Kulturen und Programmen und einer besseren grenzüberschreitenden Koordination. Nur so lassen sich die vielfältigen Bedrohungen durch invasive gebietsfremde Arten für die Umwelt, die Wirtschaft und die Gesundheit von Pflanzen und Tieren sowie insbesondere die menschliche Gesundheit effektiv bekämpfen. Dieses vierbändige Werk ist das erste, das einen umfassenden Satz nützlicher Materialien zu den zentralen Themen bereitstellt, um die gesamte globale Bedrohung durch invasive gebietsfremde Arten sowie die vielfältigen Probleme in verschiedenen Teilen der Welt deutlich zu machen, und es enthält Material, in dem potenziell replizierbare Lösungen zur Überwindung dieser Bedrohungen aufgezeigt werden. Das Werk betont die Bedrohung durch invasive gebietsfremde Arten auch im Sinne eines globalen Aufrufs zum Handeln. Invasive Arten kennen keine Grenzen. Daher hoffen wir, dass wir durch die Zusammenstellung von Material, das unterschiedliche wissenschaftliche und gesellschaftliche Standpunkte aus aller Welt berücksichtigt sowie durch die Vermittlung von Erkenntnissen und Beispielen zu einer Vielzahl damit zusammenhängender Themen, das globale Bewusstsein stärken und einheitliche nationale Reaktionen auf die Bedrohung durch invasive gebietsfremde Arten fördern können.

**Protected Areas and Tourism in Southern Africa** Lesego Senyana Stone, Moren Tibabo Stone, Patricia Kefilwe Mogomotsi, Goemeone E.J. Mogomotsi, 2022-03-23 This volume discusses the complex relationship between Protected Areas and tourism and their impact on community livelihoods in a range of countries in Southern Africa. Protected areas and tourism have an enduring and symbiotic relationship. While protected areas offer a desirable setting for tourism products, tourism provides revenue that can contribute to conservation efforts. This can bring benefits to local communities but it can also have a negative impact with the establishment of protected areas leading to the eviction of local communities from their original places of residence.

while also preventing them from accessing the natural resources they once enjoyed Taking a multi disciplinary approach this book addresses the opportunities and challenges faced by communities and other stakeholders as they endeavour to achieve their conservation goals and work towards improving community livelihoods Case studies from Botswana Malawi Namibia South Africa Tanzania Zambia and Zimbabwe address key issues such as human wildlife conflicts ecotourism wildlife based tourism landscape governance wildlife crop raiding and trophy hunting including the high profile case of Cecil the lion Chapters highlight both the achievements and positive outcomes of protected areas but also the challenges faced and their impact on how protected areas are viewed and also conservation priorities more generally The volume gives these issues affecting protected areas local communities managers and international conservation efforts centre stage in order inform policy and improve practice going forward This book will be of great interest to students and scholars of conservation natural resource management tourism sustainable development and African studies as well as professionals and policymakers involved in conservation policy

**Increasing Resilience and Adaptability to Climate Change of Vulnerable Groups in Agriculture** Seth Etuah, Faizal Adams, Zhen Liu, James Osei Mensah, Jing Lan, 2024-12-04 Climate change remains a global challenge due to the livelihood threat it poses particularly to the marginalized or vulnerable groups in society Though developing countries contribute the least to the cause of climate change they remain the most vulnerable to its effects This vulnerability is due to the over reliance of the population on rain fed agriculture as the main livelihood source These mainly smallholder farmers lack institutional technological infrastructural and economic capabilities to adapt to climate change In addition to this there are wide disparities in the allocation of key sustainable livelihood assets e g land livestock farm equipment etc among men women and youth For instance women often have limited access to land financial services social capital technology labour education and other opportunities mainly due to traditional cultural sex divisions within the domestic realm Moreover the majority of the resource poor youth are employed in the agricultural sector rendering them more vulnerable to climate uncertainties The impact of climate change on these groups men women youth and smallholders is expected to be different Studies that fail to acknowledge these differences and focus only on geographical location could be misleading Recent climate change scenarios indicate substantial reductions in the yield of staple foods linked to drought high temperature and rainfall variability with a projected overall decline in revenue from agriculture These projected negative impacts would directly influence food security and render millions of households undernourished According to the Food and Agriculture Organization FAO of the United Nations between 720 and 828 million people across the globe are already experiencing chronic hunger Additionally about 161 million children below five years of age are stunted

**Philanthropy in Contemporary Africa** Jacob Mwathi Mati, 2017-01-23 Despite the availability of a wide range of literature on what is can be construed to be philanthropic behaviour in Africa there is limited conceptual discussion on what constitutes philanthropy in African context s Yet philanthropic behaviour is culturally rooted phenomena manifesting in

diverse forms expressions and models This review contributes to a growing body of literature on conceptions and manifestations of African philanthropy The review illustrates a complex plurality of actions that fall under cultures and practices of giving in Africa These include the giving of money time knowledge influence and visibility in support of a cause valuable goods and body parts organs from living and dead While some of these actions conform to dominant Western notions of philanthropy others do not From an analysis of these practices this paper proposes that African philanthropy can be conceptually structured on the basis of spheres of philanthropic practice and the underlying bases and motivations for philanthropy On spheres of philanthropic practice at least three forms of philanthropy exist institutional formal non institutional non formal informal direct and a hybrid form that blends practices from the formal and informal spheres On motivations for giving the predominant forms are based on mutuality solidarity and counter obligation inherent in collectivist and humanistic African philosophies of life Further motivations are drawn from religious obligations institutional requirements on corporate bodies and institutional arrangements in the development process There are nonetheless significant overlaps between spheres of practice and motivations in contemporary philanthropic practices in Africa For instance philanthropic culture in Africa manifests as religious giving donations to individuals or institutions mutual aid reciprocal self help revolving fund organisations corporate social responsibility activities and individual family donations to public benefit organisations These practices highlight a rich tapestry of spheres of practice and motivations for giving practices where the wealthy and the poor are equally involved The review concentrates by choice on giving of money and time volunteering especially informal volunteering due to dearth of academic literature on other forms of giving as philanthropy in Africa

*Adaptive Collaborative Management in Forest Landscapes* Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond utilising detailed studies of forest landscapes and communities Many forest management proposals are based on top down strategies such as the Million Tree Initiatives Forest Landscape Restoration FLR and REDD often neglecting local communities In the context of the climate crisis it is imperative that local peoples and communities are an integral part of all decisions relating to resource management Rather than being seen as beneficiaries or people to be safeguarded they should be seen as full partners and Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis The volume presents detailed case studies and real life examples from across the globe promoting and prioritizing the voices of women and scholars and practitioners from the Global South who are often under represented Providing concrete examples of ways that a bottom up approach can function to enhance development sustainably via its

practitioners and far beyond the locale in which they initially worked this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasize local control inclusiveness and local creativity in management This book will be of great interest to students scholars and practitioners working in the fields of conservation forest management community development and natural resource management and development studies more broadly The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
