Zjc Maths Exam:

From Testing to Assessment Clifford Hill, Kate Parry, 2014-09-19 *From Testing to Assessment* English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings in countries such as Japan and Brazil where English functions as the language of international commerce in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government and in such countries as Canada the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications which is grounded in literacy theory as well as in practical constraints such as available human and material resources. **Horizon**
