The TI-84 Plus is a graphing calculator made by Texas Instruments which was released in early 2004. There is no original TI-84, only the TI-84 Plus and TI-84 Plus Silver Edition models. The TI-84 Plus is an enhanced version of the TI-83 Plus. The key-by-key correspondence is relatively the same, but the 84 features some improved hardware. The memory is about 3 times as large, and CPU about 2.5 times as fast (over the TI-83 and TI-83 Plus). A USB port and built-in clock functionality were also added. The USB port on the TI-84 Plus series is USB On-The-Go compliant, similar to the next generation TI-Nspire calculator, which supports connecting to USB based data collection devices and probes, and supports device to device transfers over USB rather than over the serial link port.

The TI-84 Plus Silver Edition was released in 2004 as an upgrade to the TI-83 Plus Silver Edition. Like the TI-83 Plus Silver Edition, it features a 15 MHz Zilog Z80 processor and 24 kB user available RAM. The chip has 128 kB, but TI has not made an OS that uses all of it. Newer calculators have a RAM chip that is only 48 kB. All calculators with the letter H or later as the last letter in the serial code have fewer ram pages, causing some programs to not run correctly. There is 1.5 MB of user-accessible Flash ROM. Like the standard TI-84 Plus, the Silver Edition includes a built-in USB port, a built-in clock, and assembly support. It uses 4 AAA batteries and a backup button cell battery. The TI-84 Plus Silver Edition comes preloaded with a variety of applications. These programs are also available for the TI-84 Plus, but some must be downloaded separately from TI's website. It is manufactured by Kingo Electronics.

TI offers a special yellow version of the TI-84 Plus, inscribed with the words "School Property", for schools to loan out to students. This special design was produced in effort to combat theft. Owners can buy other interchangeable colored face-plates and slide-cases online. A kickstand-style slide case and other accessories are also available. Although graphing calculators have been called inexpensive in education reform research, the TI-84 Plus Silver Edition costs \$139.00 as of 2013 on the TI online store.

In 2011, TI launched for the French market a miniaturized version of the TI-84 Plus : the TI-84 Pocket.fr. In 2012, TI launched for the Asian market a miniaturized version of the TI-84 Plus Silver Edition : the TI-84 Plus Pocket SE.

The TI-84 Plus C Silver Edition was first publicly referenced in October 2012 in a tweet from TI. Even though this tweet had gone unnoticed, in November 2012, it was discovered through a leak from a pilot class that TI was developing a color-screen TI-84 Plus, tentatively called the TI-84 Plus C Silver Edition. It has a high-resolution 320x240-pixel color screen, a modified version of the 2.55MP operating system, a rechargeable battery and keystroke compatibility with existing math and programming tools. It has the standard 2.5mm I/O linkport and a mini-USB port. More details about the calculator's math and programming features were published when TI began distributing review models in February 2013, and even more when the calculator was released in 2013.

## Software

There are three different types of programs which can be downloaded or programmed into the calculators: TI-BASIC, Z80 assembly language, and Flash applications (also written in Z80 assembly). In addition, there are programs available that are able
