

# Bearded Dragons as Pets

- 1 Bearded dragons are reptiles that can be found in the deserts of Australia. They are called "bearded" because they can flare out the skin on their throats when they are feeling threatened. Bearded dragons make excellent pets for kids because they are usually gentle creatures.
- 2 Caring for a bearded dragon can be expensive. Bearded dragons usually grow up to between twelve and twenty-four inches long. The larger a bearded dragon's tank, the happier he or she will be. A bearded dragon's habitat should be a fifty-five to seventy gallon tank with a screened lid. You will also need a special light called a UVB light to protect your reptile from developing bone problems. He also requires being kept at a temperature between seventy-five and eighty degrees, with a separate place for basking that is between ninety and one hundred degrees. Other necessary cage supplies including sand for the bottom and branches, rocks, or plants for hiding and climbing.

- 3 Bearded dragons are omnivorous, which means they eat both meat and vegetables. To make sure your pet has a nutritious diet, you will need to feed it plant foods and insects, including crickets. The insects should be no larger than the width of your dragon's mouth to make sure the reptile's intestines do not become blocked from swallowing a bug that is too large.
- 4 Taking care of a bearded dragon is a lot of work. You have to maintain the habitat so that it is safe and clean. Every day you must wash the food and water bowls in warm, soapy water. You must also clean the tank by scooping out feces, leftover food, and uneaten insects. Otherwise, they could grow bacteria and make your pet sick. The sand in the tank should be changed at least once a month.
