St. Louis Daily Market Reporter and Merchants Exchange Price Current ,1918 Taking Stock of Programs to Develop Socioemotional Skills Maria Laura Sánchez Puerta, Alexandria Valerio, Marcela Gutiérrez Bernal, 2016-08-17 This book represents a systematic review of the documented impacts of programs aimed at fostering socio emotional skills in developed and developing countries It uses a life cycle approach to organize the findings from rigorous evaluations of more than 80 programs This includes programs for toddlers and young children before primary school programs for students enrolled in formal education and programs targeted at the out of school population The book develops a conceptual framework that helps to identify the program characteristics and participants profiles associated with a range of program outcomes These include health related behavioral academic or cognitive and economic related outcomes The review finds that few of the programs studied focus exclusively on the development of socio emotional skills In fact most efforts to develop socio emotional skills are embedded within innovative education and training curricula as well as pedagogical and classroom practices Evidence shows that programs are particularly effective when targeted to highly vulnerable populations and in particular to young children Overall findings indicate that high quality programs for young children tend to foster cognitive abilities in the short run and to impact socio emotional skills over the long run Programs for students enrolled in formal education primary and secondary levels show positive and significant impacts on the outcomes reviewed The most successful of these programs are implemented school wide and follow the SAFE approach that is they are appropriately sequenced active focused and explicit Finally the review finds that programs for out of school children and youth are usually designed as a means of achieving immediate labor market outcomes e g job placement formal employment and higher wages While some of these programs show positive and statistically significant impacts on socio emotional skills the impacts tend to be small
