**Assessment Scales in Depression and Anxiety - CORPORATE** Raymond W. Lam, Erin E. Michalaak, Richard P. Swinson, 2006-08-08 There are a number of books recently published on assessment scales for depression and anxiety. However, these books are generally more detailed than clinicians require, are specific to one or other condition, or involve specialty populations such as children or geriatrics. To meet the needs of clinicians treating patients with depressive and anxiety disorders, this volume aims to bring together empirically validated assessment scales in a concise and user-friendly format. *Assessment Scales in Depression and Anxiety* illustrates the assessment scales used in clinical trials and research studies, shows how to select an assessment scale and to decide which scale to use for a particular clinical situation, and provides sample assessment scales for clinicians to use in their practice.

builds on the first edition which provided a comprehensive review and evaluation of theory and research on anxiety at the time. In the time between publications there had been many studies of anxiety phenomena and substantial progress in our conceptual understanding of the nature of anxiety and its measurement. The author incorporates those advances in empirical knowledge and new theoretical insights into this second edition. The most important and well documented empirical findings in anxiety research are emphasized throughout the book but attention is also called to unresolved theoretical issues and problem areas of the time where there was urgent need for additional research. Although much research has been done since the authoritative analysis of anxiety phenomena that is presented in this book will still be of interest to medical, social and behavioral scientists and personality theorists and to mental health workers of all disciplines who are engaged in clinical work with emotionally disturbed persons.
