Superintendent of Documents, 1990 **RAF & East German Fast-Jet Pilots in the Cold War** Nigel Walpole, 2020-11-23 You'll learn what these pilots went through knowing that their actions or reactions could trigger a global nuclear war Historic Aviation RAF and East German Fast Jet Pilots in the Cold War is the result of ten years of research involving many visits to the former German Democratic Republic by a small Anglo German team of military specialists Their purpose was to explore the lives of RAF and East German fighter and fighter bomber pilots in the air and on the ground at work and play during the Cold War in North Germany The book is based largely on personal testimony from these pilots coupled with facts drawn from official archives and comment from other historical sources Where possible political considerations have been avoided and no outright criticism has been intended readers being left to draw their own conclusions on the thinking strategies equipment and tactics discussed Far from being an intellectual polemic on the Cold War the text and photographs merely record a slice of history as seen through the eyes of a select few who took up arms in the defense of their respective homelands and faced each other daily across the Iron Curtain In an insightful conclusion Nigel Walpole reassesses the threat that both sides believed was genuine during those tense decades of the Cold War and examines the possible course and nature of a conflict which neither NATO nor the Warsaw Pact wanted but both actively planned for The writer has avoided politics where possible and in doing so reassesses the threat and uncertainty and ultimately the fears both air forces faced It's truly fascinating! Flypast **Growling Over The Oceans** Deborah Lake, 2012-01-17 The Avro Shackleton was a formidable machine with its Griffon engines producing the characteristic grumble that gave the aircraft one of its nicknames the Growler This book contains stories from the men for whom the aircraft became a way of life Combining memories and anecdotes from crew members with archive material including rare and previously unseen photographs Growling over the Oceans is an intimate and vivid introduction to the world of the Shack In the last days of World War Two the makers of the Lancaster bomber began to consider designing a new aircraft for Coastal Command It eventually became the Shackleton The men who flew and serviced the production version became fiercely proud of their aeroplane and its lack of home comforts The Shackleton's ten man crews became a legend their aeroplane was noisy gloomy and demanded constant maintenance but it bred a aircrew who became inured to long thundering and monotonous

flight and developed even taking a perverse pride in their misfortunes The Shackleton served in anti submarine warfare maritime reconnaissance and colonial policing The Cold War ensured that the threat of unrestricted submarine warfare against British shipping kept the Shackleton on permanent alert for twenty years It also became a troop transport a bomber and a search and rescue aircraft when the need arose From its first public flight in 1949 to the end of the Cold War when the Shackleton finally retired from service and entered history this book provides many reminiscences some amusing some serious of those who flew in the Shack the aircraft that struck more fear into its own crew than it did the enemy *Flying Magazine* ,1966-02 *The Combat Edge* ,1994-05 *Experimental and Computational Investigations in Engineering* Nenad Mitrovic,Goran Mladenovic,Aleksandra Mitrovic,2020-09-04 This proceedings book is a collection of high quality peer reviewed research papers presented at the International Conference of Experimental and Numerical Investigations and New Technologies CNNTech2020 held at Zlatibor Serbia from 29th June to 2nd July 2020 The book discusses a wide variety of industrial engineering and scientific applications of the engineering techniques Researchers from academia and industry present their original work and exchange ideas experiences information techniques applications and innovations in the field of mechanical engineering materials science chemical and process engineering experimental techniques numerical methods and new technologies
