Engineering , 1961-10 **Government Reports Announcements & Index** , 1989 **Automated Manual Transmission Mode Selection Controller** , 1999 A powertrain system for a hybrid vehicle The hybrid vehicle includes a heat engine such as a diesel engine and an electric machine which operates as both an electric motor and an alternator to power the vehicle The hybrid vehicle also includes a manual style transmission configured to operate as an automatic transmission from the perspective of the driver The engine and the electric machine drive an input shaft which in turn drives an output shaft of the transmission In addition to driving the transmission the electric machine regulates the speed of the input shaft in order to synchronize the input shaft during either an upshift or downshift of the transmission by either decreasing or increasing the speed of the input shaft When decreasing the speed of the input shaft the electric motor functions as an alternator to produce electrical energy which may be stored by a storage device Operation of the transmission is controlled by a transmission controller which receives input signals and generates output signals to control shift and clutch motors to effect smooth launch upshift shifts and downshifts of the transmission so that the transmission

functions substantially as an automatic transmission from the perspective of the driver while internally substantially functioning as a manual transmission
