

Prokaryotic and Eukaryotic Cells

Do all cells have the same structure?

Why?

An efficiency apartment is a one-room apartment. This one room is where you sleep, eat, shower, and entertain your guests. It all happens in one room. It is a simple way of living in a small space. A mansion is a large, complex living space with many separate rooms. There are rooms for cooking, eating, sleeping, bathing, reading, watching TV, entertaining guests, exercising, and storage. The rooms in a mansion are constructed for the specific things you would like to be able to do. You can live in simple efficiency or complexity. In this activity we will be looking at cells that are as simple as a one-room efficiency apartment or as complex as a mansion.

Model 1 – Three Types of Bacterial Cells

1. The three bacterial shapes in Model 1 are referred to as *coccus* (sphere), *spirillum*, and *bacillus* (rod). Label the diagrams in Model 1 with the correct descriptions.
2. What is represented by the small dots found in each of the bacteria cells?
3. What is the name of the outermost layer that forms a boundary around the outside of each cell?
4. How is the DNA described and what does this mean?

Roossinck,2016-09-20 An essential illustrated guide to the 101 most fascinating viruses This stunningly illustrated book provides a rare window into the amazing varied and often beautiful world of viruses Contrary to popular belief not all viruses are bad for you In fact several are beneficial to their hosts and many are crucial to the health of our planet Virus offers an unprecedented look at 101 incredible microbes that infect all branches of life on Earth from humans and other animals to insects plants fungi and bacteria Featuring hundreds of breathtaking color images throughout this guide begins with a lively and informative introduction to virology Here readers can learn about the history of this unique science how viruses are named how their genes work how they copy and package themselves how they interact with their hosts how immune systems counteract viruses and how viruses travel from host to host The concise entries that follow highlight important or interesting facts about each virus Learn about the geographic origins of dengue and why old tires and unused pots help the virus to spread Read about Ebola Zika West Nile Frog virus 3 the Tulip breaking virus and many others how they were discovered what their hosts are how they are transmitted whether or not there is a vaccine and much more Each entry is easy to read and includes a graphic of the virus and nearly every entry features a colorized image of the virus as seen through the microscope Written by a leading authority this handsomely illustrated guide reveals the unseen wonders of the microbial world It will give you an entirely new appreciation for viruses **The Micro World of Viruses and Bacteria** Melissa Mayer,2022 The world is full of tiny viruses and bacteria that can be seen only through a microscope Some bacteria can be helpful but others cause diseases such as typhoid fever Viruses can cause deadly diseases such as COVID 19 Young readers will get all the facts about bacteria and viruses including their similarities and differences how they cause infections and how people can keep dangerous germs from spreading **Viral** Matt Ridley,Alina Chan,2021-11-16

Chan and Ridley write with an urgency that inspires gripping depictions of what viruses are how infectious disease laboratories work and wonderfully lucid descriptions of bats They powerfully recount how dangerous pathogens can both leak from a lab and emerge in nature New York Times Book Review Understanding how Covid 19 started is crucial for the future of humankind Viral is the most incisive and authoritative book about the search for the source of the virus A new virus descended on the human species in 2019 wreaking unprecedented havoc Finding out where it came from and how it first jumped into people is an urgent priority but early expectations that this would prove an easy question to answer have been dashed Nearly two years into the pandemic the crucial mystery of the origin of SARS CoV 2 is not only unresolved but has deepened In this uniquely insightful book a scientist and a writer join forces to try to get to the bottom of how a virus whose closest relations live in bats in subtropical southern China somehow managed to begin spreading among people more than 1 500 kilometres away in the city of Wuhan They grapple with the baffling fact that the virus left none of the expected traces that such outbreaks usually create no infected market animals or wildlife no chains of early cases in travellers to the city no smouldering epidemic in a rural area no rapid adaptation of the virus to its new host human beings To try to solve this pressing mystery Viral delves deep into the events of 2019 leading up to 2021 the details of what went on in animal markets and virology laboratories the records and data hidden from sight within archived Chinese theses and websites and the clues that can be coaxed from the very text of the virus s own genetic code The result is a gripping detective story that takes the reader deeper and deeper into a metaphorical cave of mystery One by one the authors explore promising tunnels only to show that they are blind alleys until miles beneath the surface they find themselves tantalisingly close to a shaft that leads to the light
