contains a variety of information on Greek and Roman buildings as well as prescriptions for the planning and design of military camps cities and structures both large and small **Vitruvius** Vitruvius Pollio,1999 What is Architectural History? Andrew Leach,2013-05-03 What is Architectural History considers the questions and problems posed by architectural historians since the rise of the discipline in the late nineteenth century How do historians of architecture organise past time and relate it to the present How does historical evidence translate into historical narrative Should architectural history be useful for practicing architects If so how Leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture He suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically Read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history Graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work *The History and Practice of Ancient Astronomy* James Evans,1998-10-01 The History and Practice of Ancient Astronomy combines new scholarship with hands on science to bring readers into direct contact with the work of ancient astronomers While tracing ideas from ancient Babylon to sixteenth century Europe the book places its greatest emphasis on the Greek period when astronomers developed the geometric and philosophical ideas that have determined the subsequent character of Western astronomy The author approaches this history through the concrete details of ancient astronomical practice Carefully organized and generously illustrated the book can teach readers how to do real astronomy using the methods of ancient astronomers For example readers will learn to predict the next retrograde motion of Jupiter using either the arithmetical methods of the Babylonians or the geometric methods of Ptolemy They will learn how to use an astrolabe and how to design sundials using Greek and Roman techniques The book also contains supplementary exercises and patterns for making some working astronomical instruments including an astrolabe and an equatorium More than a presentation of astronomical methods the book provides a critical look at the evidence used to reconstruct ancient astronomy It includes extensive excerpts from ancient texts meticulous documentation and lively discussions of the role of astronomy in the various cultures Accessible to a wide audience this book will appeal to anyone interested in how our understanding of our place in the universe has changed and developed from ancient times through the Renaissance The Transformation of Vernacular Expression in Early Modern Arts Joost Keizer,Todd Richardson,2011-10-14 Including contributions by historians of early modern European art architecture and literature this book examines the transformative force of the vernacular over time and different regions as well as the way the concept of the vernacular itself changes in the period **History of Architectural Theory** Hanno-Walter Kruft,1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to

the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Krut has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive

Studies in the History of Services and Construction James Campbell, Amy Boyington, Yiting Pan, Nina Baker, Michael Heaton, Michael Tutton, David Yeomans, Henrik Schoenefeldt, Michael Driver, 2018 Building services are often overlooked in the history of architecture and engineering This volume presents 41 papers presented at the Fifth Annual Conference of the Construction History Society held at Queens College Cambridge from 6-8 April 2018 which cover a wide variety of topics on aspects of construction history and building services

Carbon Neutral City Jun Wang, 2025-08-22 This book introduces the ecological low carbon and sustainable concept of ideal cities from different views With beliefs and practices of scholars in the past in pursuit of ideal cities it is written with historical events in the development of low carbon cities In this way activities about carbon peaking and carbon neutrality happening worldwide at present can be shown and efforts variety countries have paid off can be exhibited Besides as for the centralized and the distributed space structure in urban evolution the book discusses their trends and comes up with an ideal model the distributed city to realize carbon neutrality based on the distributed structure Therefore with a practical example in planning the feasibility of the distributed city is analyzed in several fields including space energy traffic water waste disposal etc The book can be used as materials for professionals in city planning and construction low carbon development and other fields as well as a way for ordinary people to learn about the complex city

Transparent Plastics Simone Jeska, 2007-10-05 A fascinating guide to building with transparent plastics Prominent international avant garde architects such as Shigeru Ban and Herzog de Meuron frequently use transparent plastic for their structures Transparent plastic seems ephemeral and thus captures the spirit of the times

Constructing the Architect Leonard R. Bachman, 2019-01-22 Unlike books that concentrate on the monuments and other artefacts that architects produce Constructing the Architect focuses on architecture as a disciplinary and professional process an institution of society and a career of learning and mastery In doing so it offers a lens into the architecture of architecture Mapping architecture as a coherent whole Leonard Bachman shows that the field must be understood as four mutually reinforcing modes of inquiry design research strategy and education Within this framework he explains how institutions and actors hold differing perspectives on the critical discourse that advances architecture and identifies the various tensions and leverage points for change within the discipline Featuring over 100 illustrations to support understanding of this highly visual subject this is an essential introduction for any student seeking to understand what it means to be an architect and to enter the professional discourse

Times of Creative Destruction Alexander Tzonis, Liane Lefaivre, 2016-12-08 Times of Creative Destruction is about the years that followed the end of WWII one of the most seminal and dramatic epochs in human history during which extraordinary star buildings were

born cities exploded and an unprecedented world of a Third Ecology emerged Never before was there such a flurry of daring mega constructions such daring spatial acrobatics star buildings by star architects attained by star developers mega constructions technological feats and flourishing spatial acrobatics But for all its exhilarating creativity this was also an era of unanticipated intractable irreversible destruction reducing the uniqueness and diversity of cultural social and ecological peaks and valleys of our world to a desert flatland environmental inequality and unhappiness This book critically discusses and reevaluates these contradictory events bringing together and commenting on a selection of shorter key texts by Tzonis and Lefaivre the product of a rare research and writing partnership The texts published between the early 1960s and the present are significant as documents that inform about the period They are also important and timely because of their critical and influential role in the debates of this era both creative and destructive Nature as Model Luke Morgan,2007 Salomon de Caus was a pivotal figure in the dissemination of the design principles and motifs of the Italian Renaissance garden throughout Europe By setting the record straight in this biography Luke Morgan rewrites the received history of early seventeenth century garden design *The Grove Encyclopedia of Medieval Art and Architecture* Colum Hourihane,2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture

Advances in Technology Wim Kouwenhoven,2009-10-01 From 3rd to 5th March 2008 the International Association of Technology Education and Development organised its International Technology Education and Development Conference in Valencia Spain Over a hundred papers were presented by participants from a great variety of countries Summarising this book provides a kaleidoscopic view of work that is done all over the world in higher education characterised by the key words Education and Development I wish the reader an enlightening experience The Palladian Landscape: Geographical Change and Its Cultural Representations in Sixteenth-Century Italy , While the themes sources and materials of The Palladian Landscape span a range of disciplinary interests from art and architectural studies economic social and environmental history to philosophy and Renaissance humanism Denis Cosgrove seeks to provide a geographical interpretation of a region of northern Italy in the specific period of the late Renaissance However he goes much further using the thoughts designs and commissions of the architect Palladio as the central thread to weave a picture of a place Venice that is in a period of crisis as it seeks to survive a transition from a maritime power hinterland to a new land based terraferma As a cultural geographer he seeks to understand how groups come to terms with and transform their material environments and he therefore pays special attention to the intellectual forces and spiritual sensibilities that empower those groups as well as to the economic social and environmental constraints with which they have to contend Although these two broad realms of human experience are often

studied separately Cosgrove brings them together in this study He uses the leitmotif of architecture and specifically the work of Andrea Palladio to describe a localized transformation of the natural world into a landscape of expression of cultural meaning Beyond this leitmotif the work adopts an essay structure in which each chapter stands somewhat separately as a spatial narrative It moves from the imperial city of Venice into its Italian territories and thence from city to rural landscape to specific country estates Having described localized transformations of urban and rural landscapes Cosgrove then expands the scale again to consider hydrological engineering in the Venetian territories and some of the techniques involved in surveying and mapping the landscape These return the reader to the more global view of a Venetian mentalit coming to terms with a changing geographical and historical world map

Architecture's Theory Catherine Ingraham, 2023-04-18 A collection of illuminating essays exploring what theory makes of architecture and what architecture makes of theory in philosophical and materialized contexts From poststructuralism and deconstruction to current theories of technology and nature critical theory has long been closely aligned with architecture In turn architecture as a thinking profession materializes theory in the form of built work that always carries symbolic loads In this collection of essays Catherine Ingraham studies the complex connectivity between architecture's discipline and practice and theories of philosophy art literature history and politics She argues that there can be no architecture without theory Whether considering architecture's relationship to biomodernity or exploring the ways in which contemporary artists and designers engage in figural play Ingraham offers provocative interpretations that enhance our understanding of both critical theory and architectural practice today Along the way she engages with a wide range of contemporary theorists including Giorgio Agamben Judith Butler Jacques Derrida Graham Harman and Timothy Morton considering buildings around the world including the Palace of Culture in Warsaw the Viceroy's House complex in New Delhi Mack Scogin and Merrill Elam's Wolfsburg Science Center project in Germany and the Superdome in New Orleans Approaching its subject matter from multiple angles Architecture's Theory shows how architecture's theoretical and artifactual practices have a unique power to alter culture

Architects and Intellectual Culture in Post-restoration England Matthew Walker, 2017 Looking to the works of prominent architects and intellectuals such as John Evelyn Robert Hooke Sir Christopher Wren and Roger North this volume explores the origins of the study of architecture as an intellectual pursuit in late seventeenth century England
