### Brain and Heart Crosstalk

Hemanshu Prabhakar,Indu Kapoor,2020-06-15 This book discusses the underlying mechanisms connecting the brain and heart The physiology of the brain is such that it is easily affected by any altered physiology of other systems which in turn may compromise cerebral blood flow and oxygenation Together the brain and heart control our body systems allowing them to function automatically This interaction between the brain and other systems makes it important for us to understand how any kind of injury to the brain can produce complications in remote organs or systems such as the heart The central nervous system is responsible for vegetative function and is central to homeostasis Further central nervous system responses are linked to the ongoing function of other organ systems e g feeding thermoregulation reproduction and muscle activity It is therefore logical that neural control of the cardiovascular system must also interact with the neural control of other organ systems This book explains in detail stressed cardiac conditions discussing the pathophysiology and proposed treatment and

also describing lesser known crosstalks between the acutely or chronically affected brain and heart      **Devices for Cardiac**
