Education Unbound Frederick M. Hess, 2010-07-13 What if it's the system that's the problem? What if the key to breakthrough school improvement is not mandating new solutions built on an elusive combination of the right standards, pedagogy and assessments but removing entrenched bureaucratic barriers and rethinking restrictive norms and routines? What if we were free to start from scratch? This is the greenfield reform strategy. Create an environment that invites new solutions to surface and provide the infrastructure necessary for them to succeed. In *Education Unbound: The Promise and Practice of Greenfield Schooling* Frederick M. Hess advocates for an entrepreneurial approach focused on supporting outstanding teaching and learning. Sharing the examples of organizations whose bold alternative strategies represent promising shifts in K-12 education, Hess builds a case for school systems marked by data on performance and productivity and compelled to compete on cost and quality. Personnel policies designed to attract, retain and reward teachers and leaders committed to excellence. Education funding configured to support new ventures and foster creative problem solving. The goal, Hess argues, ought not to be the creation of a new 'best' system but schools capable of evolving with the students and society they serve. *Education Unbound* is a catalyst for conversation and change and a must read for practitioners, policymakers, would-be education entrepreneurs and anyone committed to school excellence and the next steps in education reform.

Kristen J. Amundson, 2022-11-21 COVID-related school closures affected all students. But for students who needed in-person schooling, most students with disabilities, English learners and students living in poverty, the impact was disproportionate and devastating. One research calls it the largest increase in educational inequity in a generation. *Unfinished Learning* follows families as they navigate the challenges of virtual learning from figuring out how to log on to a sometimes unstable school platform to ensuring that their child's special education needs were addressed. It looks at what data is now showing about which students are and which students are not recovering from learning lost during the pandemic. The book also traces the

parent activism that arose as a result of school closures It explores two elections that followed close on the heels of school reopenings the 2021 election for governor in Virginia and the 2022 recall of school board members in San Francisco Many of the conclusions drawn by pundits about both those elections do not fit with either the polling or with parent interviews Finally the book offers some suggestions on how schools families and communities can prepare for the inevitable next school closures
