Vixen Polaris Mount Manual:

The Vixen Star Book User Guide James Chen, Adam Chen, 2015-10-01 This book is for anyone who owns or is thinking of owning a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech computer driven Go To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

The Astrophotography Manual Chris Woodhouse, 2015-05 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae, galaxies, clusters and the solar system. This combination of technical background information and the hands on approach brings the science down to earth with a practical method to plan for success. Features include over 400 images, graphs and tables to illustrate these concepts. A wide range of hardware to be used including smartphones, tablets and the latest mount technologies. How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop and PixInsight. Case studies showing how and when to use certain tools and overcoming technical challenges. How sensor performance and light pollution relate to image quality and exposure planning.
