Topics and Trends in Current Statistics Education Research Gail Burrill, Dani Ben-Zvi, 2018-12-29 This book focuses on international research in statistics education providing a solid understanding of the challenges in learning statistics. It presents the teaching and learning of statistics in various contexts including designed settings for young children, students in formal schooling, tertiary level students and teacher professional development. The book describes research on what to teach and platforms for delivering content, curriculum strategies on how to teach for deep understanding and includes several chapters on developing conceptual understanding, pedagogy and technology, teacher knowledge and beliefs and the challenges teachers and students face when they solve statistical problems, reasoning and thinking. This new research in the field offers critical insights for college instructors, classroom teachers, curriculum designers, researchers in mathematics and statistics education as well as policy makers and newcomers to the field of statistics education. Statistics has become one of the key areas of study in the modern world of information and big data. The dramatic increase in demand for learning statistics in all disciplines is accompanied by tremendous growth in research in statistics education. Increasingly, countries are teaching more quantitative reasoning and statistics at lower and lower grade levels within mathematics, science and across many content areas. Research has revealed the many challenges in helping learners develop statistical literacy, reasoning and thinking and new curricula and technology tools show promise in facilitating the achievement of these desired outcomes.

Teaching Secondary School Mathematics Merrilyn Goos, Colleen Vale, Gloria Stillman, Katie Makar, Sandra Herbert, Vince Geiger, 2020-07-16 Since its first publication, *Teaching Secondary School Mathematics* has established itself as one of the most respected and popular texts for both pre-service and in-service teachers. This new edition has been fully revised and updated to reflect the major changes brought about by the introduction of the Australian Curriculum Mathematics as well as discussing significant research findings, the evolution of digital teaching and learning technologies and the implications of changes in education policies and practices. The mathematical proficiencies that now underpin the Australian curriculum, understanding, fluency, problem solving and reasoning, are covered in depth in Part 1 and a new section is devoted to the concept of numeracy. The chapter on digital tools and resources has been significantly expanded to reflect the growing use of these technologies in the classroom while the importance of assessment is recognised with new material on assessment for learning and as learning along with a consideration of policy development in this area. Important research findings on common student misconceptions and new and effective approaches for teaching key mathematical skills are covered in detail. As per the first edition, readers will find a practical guide to pedagogical approaches and the planning and enactment of lessons together with enhanced chapters on teaching effectively for diversity, managing issues of inequality and developing effective relationships with parents and the community. This book is the essential pedagogical tool for every emerging teacher of secondary school mathematics. The text offers an excellent resource for all of those involved in the
