Toshiba is able to commercialise leading-edge CMOS processes for advanced ICs one to two years ahead of the industry, to the direct benefit of our 300mm manufacturing customers. By leading the industry in producing high-performance system-level ICs in 300mm since 2003, plus early production of 65nm in 2006 – with development of 40 and 28nm process technologies underway – Toshiba is able to stay ahead of the yield curve and is continuously solving DFM complexities to enhance performance, minimise time to market and reduce IC cost.
