Designing Computer-Based Learning Materials Alan Clarke,2018-10-26 First published in 2001 this volume demonstrates how computer based learning has the potential to

provide a highly motivating learning experience that it also has the potential to achieve exactly the opposite and that the difference between these two extremes is the quality of the learning design. The challenge for the learning designer isn't a simple one. You are being asked to prepare interactive learning for someone you can't see and with whom the only interaction you are likely to have is via limited written communication. Fortunately, help is at hand in Alan Clarke's *Designing Computer Based Learning Materials*. Dr. Clarke offers a definitive guide to each of the many elements involved in good design. This book explores the principles of adult learning and relates to the potential features and impact of computer-based learning. This is not a how-to book but rather one seeking to help you understand the different elements which go into computer-based learning. If you are commissioning material, it will help you to understand the contractor's constraints. If you are designing materials yourself, it will allow you to avoid many of the errors it is all too easy to make when developing them. Computer-based learning materials are not all the same; their range reflects the variety of learners that use them and purposes they are used for: the different learning environments that are available to people, the different subjects that they wish to learn, and the level to which they wish to take them. In the face of such a complex task involving so many factors and variables, it is essential that the learning designer understands what is involved and uses a rigorous process for envisioning, planning, designing, implementing, and testing their solution. This is a book about learning design and not about software production, and as such it provides any aspiring designers with the fundamentals of producing the highly motivating learning experience which should be their objective.

Handbook of Construction Management and Organization Joseph Frein, 2012-12-06. The primary purpose of this handbook is to make available to general contractors, consulting engineers, construction managers, specialty contractors, and subcontractors, as well as to professors and students in Universities and technical institutes which offer courses on the subject, the fundamentals of construction management together with the most workable types of organization and the necessary capabilities they must include to reasonably ensure success and minimize the possibility of failure in this most hazardous profession. The second and equally important purpose is to furnish equipment manufacturers, dealers, material suppliers, bankers, surety bondsmen, and others who traditionally rely on financial statements and general reputation something more concrete to look for: the type of management and organization and its scope and capability in deciding how far to go along with contractors with whom they deal or wish to deal. This is the second edition of the Handbook, an updated version of the work published in 1973. The book covers very many subjects which are part of construction. The greatest care was exercised in consideration of their practical aspects based on the theory and practice of construction management and its structure and the functions of the various departments both in the field and central offices that make up construction organization. Leading specialists in their particular fields were selected to write chapters on the vital segments making up the structure of construction management and organization. These fields include construction contracts and conditions, job organization by general types of projects, equipment maintenance, and preventive maintenance and overhaul engineering, and

estimating scheduling and controls data processing and the use of computer equipment in engineering and accounting techniques office administration corporate and cost accounting payroll employment and labor relations safety public relations legal and contractual problems banking and finance taxes surety bonding insurance pension and retirement problems and others
