Social Studies Curriculum: The humanities in three cities, 1967 *Teaching Music History with Cases* Sara Haefeli, 2022-11-22 *Teaching Music History with Cases* introduces a pedagogical approach to music history instruction in university coursework. What constitutes a music historical case? How do we use them in the classroom? In business and the hard sciences, cases are problems that need solutions. In a field like music history, a case is not always a problem but often an exploration of a context or concept that inspires deep inquiry. Such cases are narratives of rich, complex moments in music history that inspire questions of similar or related moments. This book guides instructors through the process of designing a curriculum based on case studies, finding and writing case studies, and guiding class discussions of cases. **"So What Are You Going to Do with That?"**

Susan Basalla, Maggie Debelius, 2014-12-26 Graduate schools churn out tens of thousands of PhDs and MAs every year. '74 and Sunny A. J. Benza, 2015-07-21 A surprisingly tender coming of age story of a close knit yet tough Sicilian American family that accepts and welcomes a young boy struggling to understand himself by the former Daily News New York gossip columnist and E television host A J Benza's distinctive blend of wit dry humor and genuine tenderness shines through this candid compelling memoir about the summer of 1974 when his shy effeminate cousin comes to live with A J's family which is dominated by his short tempered outspoken hyper masculine father At its core A J's story is about learning that being exactly who you were meant to be is the only thing that matters Through anecdotes of fishing with his father playing tackle football and conquering neighborhood bullies he tells a story of triumph and acceptance of a loving

but rough around the edges family that puts aside its prejudices to welcome with open arms a young boy struggling to understand his sexuality and ultimately accept himself In a sometimes raw and always endearing voice 74 and Sunny is a revelatory account of a life defining summer on Long Island when tolerance wins over ignorance family neutralizes fear and love triumphs over all For anyone who s navigated the choppy seas of adolescence this story about redefining what it means to be a man and learning to accept those whom we might fail to understand will surely resonate *Imagined Truths* Bryant Griffith,2012-01-01 Education is often envisioned as a linear one way cause and effect process with teaching as the cause learning as the effect But the relationships are less tidy less passive and more cyclical than that There is a continuous cycle of inquiry discovery and integration leading to further inquiry Technology facilitates the exchange of information not just teacher to student but student to teacher and student to student The result is that the nature of the development of learning knowledge and even wisdom becomes more transparent This presents challenges of method and identity for the teacher but more importantly it enforces a sense among students of their critical investment in their own education Teachers and learners need to contemplate why and how they construct knowledge An essential part of this reflection is questioning the premises that govern our views of the world as well as the premises of what is presented as knowledge This demands a new epistemology and requires that teachers change their conceptual structures and recognize that all theories of knowledge are not founded solely on formal logic using uninterpreted experience as data Moreover it demands that new models be considered as ways of making sense and of understanding As teachers we realize that learning how to cope with changes of this magnitude requires leadership where relationships are crucial The rapidly emerging significance of social networks is reshaping our world a world that isn t flat but where spiky concentrations of people work together to make things happen creatively It is more the case that the education we need to provide is to solve problems we can t conceive Our cultural narratives when freed of the bounds of instrumental learning become powerful tools for an emerging world where questions and answers are not simple cause and effect equations Yes the teacher is a facilitator but one with the mastery of sufficient material to be able to paint numerous contexts for the learner We need to be open attentive and anticipatory to that which may surprise us to that which we will not expect The shape of past knowledge can be discovered by reflecting on the ways in which we make decisions and by asking why questions These questions frame intentions and focus on the specific process of knowing why and how ideas have changed from the past to the present By placing the self in the middle this process becomes a trialectic of relational thought which in turns becomes the dialectic of learning *Content Area Reading* Mary M.
