Beckett, Gerald J. Conlogue, Andrew Nelson, 2020-08-05 The case studies provided in Case Studies for Advances in Paleoimaging will provide the reader with real world scenarios and case examples that will help prepare researchers to discover new ways to apply the various modalities associated with the technology This book is a follow up to the Beckett and

Conlogue's classic work *Paleoimaging 2009* and companion to their new contribution *Advances in Paleoimaging 2020*. The case studies outlined demonstrate the problem solving nature of imaging research and the application of critical thought to unique problems. *Further Case Studies for Advances in Paleoimaging* demonstrates the incredible depth of application of these modalities including photography, endoscopy, x-ray, fluorescence, plane radiography, digital radiography, and advanced imaging modalities like multi-detector computed tomography, micro computed tomography, and magnetic resonance imaging. Of particular note, case study seven *Contrast Media Injections* informs the researcher regarding methods to bring out specific anatomic structures that may be the target of a given research question. Intended for students, faculty, and seasoned researchers, *Case Studies for Advances in Paleoimaging* presents actual cases from the authors' vast experience in the application of paleoimaging modalities in order to answer unique research problems. The book also serves as a field manual for current and future researchers as they approach similar or new cases that present unique challenges. These cases demonstrate how the varied imaging methodologies can provide data which greatly enriches our understanding of the subject at hand, be it ancient cultural remains, forensic recovery, museum holdings, or other anthropological and archaeological artifacts.
