

ICD Series FAQ

Q1 Are there any tips on how to record a message best?

A1 **When dictating a speech:**
Set the MIC SENS (microphone sensitivity) to LOW. When recording a message, hold the IC recorder so that the microphone is close to the speaker's mouth.

When recording a lecture or meeting:
Set the microphone sensitivity (MIC SENS) to HIGH. When recording a message, place the IC recorder so that the microphone faces the sound source.
Keep the distance from the sound source to within 3 to 4 m when recording with the built-in microphone. When the distance from the speaker is longer than the recommended distance, we suggest you use an external microphone such as a zoom microphone.
When recording a message with the IC recorder placed on a table or other surface, place a cushion between the IC recorder and the table so that you can reduce possible noises that may travel through the table.

Note

Noise may be recorded if an object, such as your finger, etc., accidentally rubs or scratches the unit during recording.

Q2 Can I use Ni-H (nickel-hydrogen) or Ni-Cd (nickel-cadmium) rechargeable batteries?

A2 We recommend you use alkaline batteries, but you can also use Ni-H (nickel-hydrogen) or Ni-Cd (nickel-cadmium) rechargeable batteries. Please note, however, the battery life of a rechargeable battery is shorter than that of an alkaline battery. (The battery indicator may not show full capacity, since the voltage of Ni-H and Ni-Cd rechargeable batteries is 1.2 V.)

Q3 Can I use manganese batteries?

A3 You cannot use manganese batteries. (If you use them, the battery life will be extremely short.)

Q4 The display always appears on the window of the IC recorder. Isn't there a power on/off button?

A4 The unit is not equipped with a power on/off button. The display always appears on the window. The power consumption for the display is very small and will not have any appreciable influence on the battery life shown in the operating instructions.
Depending on the IC recorder model you use, you can turn off the display by sliding the HOLD switch to ON.

Q5 If I leave the batteries inserted, aren't they consumed even when the IC recorder is not used?

A5 Even if you do not use the IC recorder, the batteries are consumed slightly. The battery life in this case varies depending on the IC recorder model, humidity or other environmental conditions. Usually, the batteries last two to three months. If you do not intend to use the IC recorder for an extended period of time, we recommend that you remove the batteries.

Q6 Which type of external microphones should I use? Can I use a stereo microphone?

A6 You can use the electret condenser microphones such as the ECM-C10 (tiepin-type), the ECM-DM5P (direct-in type), or the ECM-Z60 (zoom microphone). You can also use a stereo microphone, but the right (R) channel of the sound will not be input. Only the left (L) channel of the sound will be recorded in monaural.

Q7 To record the IC recorder sound with other equipment (tape recorder, MiniDisc player, etc.), how should I connect the other equipment?

A7 Use an audio-connecting cable to connect the earphone (headphones) jack of the IC recorder to the microphone or line input jack of a tape recorder, a MiniDisc player, or other device.

Notes

- To connect to the microphone jack of an external device, use an audio-connecting cable with a resistor.
- To connect to the line input jack of an external device, use an audio-connecting cable without a resistor.
