Towards Bicultural Competence Beyond Black And White:

Towards Bicultural Competence Gloria Gordon, 2007 This book draws on first person action research and inquiry research process to provide a cultural analysis of black experience in white dominated society The author uses her personal experience of working with the racial confusion with which she lived until she decided to engage with what it means to be black instead of avoiding and denying it Her research takes her back in time to a shared history of slavery and colonization outwards to her experiences in white society and inwards to explore the psychological costs of her long silence The outcome is a book which offers a visionary and futuristic view of how whites and blacks can begin to work with the visible and invisible legacies of their shared histories towards a better world and guides readers towards the goal of conscious bicultural competence It explores the experience of members of the African Diaspora today providing important insights into many of the social problems they face in contemporary society such as the widely espoused underachievement of black boys in the British school system The book is an important text for understanding black and white relationships across the world an essential dimension of global social process It is essential reading for teachers educators and policy makers teacher trainers parents and everyone black and white who wants to understand how social inequality is maintained And it is especially timely in the year marking Britain's 200th anniversary of the legal abolition of the slave trade

Transforming Race Conversations Eugene Ellis, 2024-07-30 A guide to supporting our emergence from the tight grip of race discomfort If we are to address the injustice of racism we need to have the race conversation All too often however attempts at this conversation are met with silence denial anger or hate This is largely because the construct of race resides not only in our minds but principally in the body In order to have productive conversations about race and racism a paradigm shift is needed one which will empower us to remain present and embodied rather than constricted with fear regardless of our racial identities Here psychotherapist Eugene Ellis explores what is needed for this bodily shift to occur as he unpacks the visceral experience of the race conversation He offers a trauma informed neurophysiological approach that emphasizes resourcing body awareness mindfulness and healing Transforming Race Conversations is essential reading for therapy practitioners as well as anyone looking to engage more effectively in the ongoing dialogue around race

Tell it Like it is Brian Richardson, 2007 **Interdisciplinary Perspectives on Colorism** Ronald E. Hall, 2022-07-22 This timely and unique book explores the concept of colorism which is discrimination based on the color of a person's skin in a world where arguably light skin is privileged over dark and one's wealth health and opportunities are impacted by skin color sometimes irrespective of one's racial background In the context of our multi cultural and increasingly global society and the historical backdrop of slavery the text takes a unique approach by moving from personal anecdotes to adopting a scientific perspective grounded in empirical evidence Hall explores how skin color is a more effective framework for examining prejudice and discrimination as racial identities become increasingly mixed due to inter racial unions and immigration He argues that racism as discrimination by race is contrived polarizing and non quantifiable and that it is often skin color that is used to identify race often inaccurately With skin color being a visual and physical characteristic with race based prejudices attached to it the author shows how skin color can be a loaded identifier of value and identity In a world where the objective measure of skin color crosses racial boundaries and where race will become increasingly indiscernible over time the ultimate aim of this book is to prepare for the social future of mankind that has already begun to take shape Split into three parts examining historical contemporary and potential future perspectives on colorism this is fascinating reading for students and academics in psychology social work education criminal justice and other social sciences The text will also be useful for providing validation for including colorism into the public domain **Race and Rhyme** Love Lazarus Sechrest, 2022-08-23 A

Navigating the Future Geraldine Downey, Jacquelynne Eccles, Celina Chatman, 2006-01-12 Psychologists now understand that identity is not fixed but fluid and highly dependent on environment In times of stress conflict or change people often adapt by presenting themselves in different ways and emphasizing different social affiliations With changing demographics creating more complex social groupings it is important to understand the costs and benefits of the way social groups are categorized and the way individuals understand cope with and employ their varied social identities Navigating the Future edited by Geraldine Downey Jacquelynne Eccles and Celina Chatman answers that call with a wealth of empirical data and expert analysis Navigating the Future focuses on the roles that social identities play in stressful challenging and transitional situations Jason Lawrence Jennifer Crocker and Carol Dweck show how the prospect of being negatively stereotyped can affect the educational success of girls and African Americans making them more cynical about school and less likely to seek help The authors argue that these issues can be mitigated by challenging these students educationally expressing optimism in their abilities and emphasizing that intelligence is not fixed but can be developed The book also looks

at the ways in which people employ social identity to their advantage J Nicole Shelton and her co authors use extensive research on adolescents and college students to argue that individuals with strong positive connections to their ethnic group exhibit greater well being and are better able to cope with the negative impact of discrimination Navigating the Future also discusses how the importance and value of social identity depends on context LaRue Allen Yael Bat Chava J Lawrence Aber and Edward Seidman find that the emotional benefit of racial pride for black adolescents is higher in predominantly black neighborhoods than in racially mixed environments Because most people identify with more than one group they must grapple with varied social identities using them to make connections with others overcome adversity and understand themselves Navigating the Future brings together leading researchers in social psychology to understand the complexities of identity in a diverse social world
