Amazon Town Charles Wagley, 2014 Amazon Town A Study of Human Life in the Tropics is Charles Wagley's classic ethnography of peasant life in the Amazon with updated material by Conrad Kottak and Richard Pace [International Financial Statistics Country Notes 2013](#) International Monetary Fund. Statistics Dept., 2013-08-13 This issue of International Financial Statistics IFS Country Notes presents in two sections brief information on the data published in IFS The first section provides a description of the compilation techniques underlying selected area and world tables The second identifies for each country the standard sources of the statistics and provides some explanatory material on each country's data including any breaks in the series Country Notes is designed to be a companion volume to each version of IFS the monthly print edition the yearbook the CD ROM and the Internet It will normally appear as an annual volume and will be shipped with the print edition of the International Financial Statistics Yearbook during August each year The aggregate Industrial Production Index for the industrial countries as a group is calculated by the Statistics Department from industrial and manufacturing production indices that are published in the country pages Private commercial banks report data based on the Gregorian calendar while state owned commercial banks report data based on the Solar calendar This results in differences in the interbank positions for other depository corporations [The Garden City Movement Up-To-Date](#) Ewart Gladstone Culpin, 2015-03-05 This work was written and compiled by the then Secretary of the Garden Cities and Town Planning Association in 1913 It shows just how much the conception of the garden city had been broadened from Howard's original texts Indeed the Association's own name had been broadened to add the newly emergent practice and theory of town planning to the original focus Alongside the garden city recognition is now given to the burgeoning numbers of garden suburbs and garden villages Many examples of these are identified and briefly described including many which are small and now little known greatly adding to the interest of the publication Even the underlying arguments for such developments differ Alongside the more altruistic arguments in favour of reform there are now those which explicitly emphasise the need to ensure a healthy race to maintain the Empire [Social Change in Town and Country in Eleventh-Century Byzantium](#) James Howard-Johnston, 2020-09-10 The history of Byzantium pivots around the eleventh century during which it reached its apogee in terms of power prestige and territorial extension only then to plunge into steep political decline following serious military defeats and extensive territorial losses The political economic and intellectual history of the period is reasonably well understood but not so what was happening in that crucial intermediary sphere the social order which both shaped and was shaped by contemporary ideas and brute economic developments This volume aims to deepen understanding of Byzantine society by examining material evidence for settlements and production in different regions and by sifting through the far from plentiful literary and documentary sources in order to track what was happening in town and country There is evidence of significant change the pattern of landownership continued to shift in favour of those with power and wealth but there was

sustained and effective resistance from peasant villages Provincial towns prospered in what was an era of sustained economic growth and through newly emboldened local elites took a more active part in public affairs In the capital the middling classes comprising much of officialdom and leading traders gained in importance while the twin military and civilian elites were merging to form a single governing class However despite this social upheaval careful analysis of these various factors by a range of leading Byzantine historians and archaeologists leads to the overarching conclusion that it was not so much internal structural changes which contributed to the vertiginous decline suffered by Byzantium in the late eleventh century as the unprecedented combination of dangerous adversaries on different fronts in the east north and west
