Windows Movie Maker 2 Zero to Hero John Buechler, Jon Bounds, Jennifer Dehaan, 2013-11-11 You've seen the promises in the advertising Microsoft's free Movie Maker 2 will make it simple to capture, edit, and share your home movies. We agree, but how do you know where to start or where you're going? The answer is Windows Movie Maker 2 Zero to Hero, which will take you from filming your movie with useful tips to improve the quality through editing and adding effects to premiering your masterpiece to your friends and family. Zero to Hero is more than a catchy slogan and an opportunity for puns and graphical representations of tights, capes, and phone booths. It's a style of learning designed by friends of ED to reach beyond dry technical explanations and dusty old authors who don't know how it is for real users and wouldn't know good design if it slapped them round the face with a wet fish. With a Zero to Hero book, you can choose how you learn. You can choose to learn everything you need to know about Windows Movie Maker 2 by working through the first section of the book from start to finish. Alternatively, you can dive straight in to the inspirational Hero chapters and refer back as and when you need. Then later when you're a hero yourself, the book is easily used as a reference tool. When you're done, you'll be ready to wear your underwear on the outside, metaphorically speaking, of course.

Resources, Technology and Strategy Nicolai Foss, Paul L. Robertson, 2007-03-26 *Resources, Technology and Strategy* brings together contributors from Europe, North America, and Asia to consider the strategic relationship between technology and other resources such as production capabilities, marketing prowess, finance, and organisational culture. Throughout the book, these experts take a critical approach to RBP (Resource Based Perspective) in order to assess both its strengths and weaknesses. Case studies also highlight the importance of both having and not having strong technological capabilities in settings as diverse as the US semiconductor industry, small family manufacturing firms in Hong Kong, and state-owned enterprises in China.
