Out of Bounds and Out of Control James V. DeLong, 2002-09-25 Out of Bounds Out of Control measures the enforcement activities of the Environmental Protection Agency against that standard and finds them disturbingly deficient Environmental regulation is so detailed and obscure that no one can identify all relevant mandates let alone ensure compliance EPA maintains broad discretion to define legal violations and resists any checks Discretion is exercised retroactively or arbitrarily People fear to dispute the agency's interpretation of its power or express doubts about the absolute primacy of its mission lest they be made into examples The concept of intent has become so attenuated that it provides no limitation on prosecution The EPA also blurs the lines separating governmental powers Using its open ended authority to interpret vague statutes it makes the laws that define its own powers then investigates prosecutes adjudicates and penalizes Judicial checks are sporadic This panoply of authority breeds regulatory zealotry and a disregard for the rights of the regulated The book however is more than a sobering look at a legal theory In story after story specific regulatory abuses are examined many of which are positively Kafkaesque Moreover many of the problems documented in the book are pandemic across the government The ultimate lesson to be drawn is that deep structural reform is needed to restore the rule of law to administrative agencies
