Good citizenship from a Christian Perspective Acts, Intentions, and Moral Evaluation Craig M. White,2022-12-27 This book argues that the moral quality of an act comes from the agent s inner states By arguing for the indispensable relevance of intention in the moral evaluation of acts the book moves against a mainstream objective approach in normative ethics It is commonly held that the intentions knowledge and volition of agents are irrelevant to the moral permissibility of their acts This book stresses that the capacities of agency rather than simply the label agent must be engaged during an act if its moral evaluation is to be coherent The author begins with an ontological argument that an act is a motion or a causing of change in something else He argues that the source of an act s moral meaning is in the agent specifically what the agent if aware of relevant facts around her aims to accomplish He then moves to a series of critical chapters that consider arguments for mainstream approaches to act evaluation including Thomson s dismissal of the agent knowledge and volition requirements Scanlon s arguments for a derivative relevance of intentions to permissibility Frowe s causal roles of agents in the moral evaluation of acts and Bennett s explicit defense of the objective approach The book concludes by offering the author s preferred replacement for the objective approach an Aristotelian Thomist view of acts Acts Intentions and Moral Evaluation will be of interest to scholars and advanced students working in ethics just war theory the ethics of self defense and philosophy of action
