Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i.e. the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to

different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Contemporary Classics in the Life Sciences: Cell biology James T. Barrett,1986 **The Hundred Year Diet** Susan Yager,2010-05-11 A lively cultural history of the American weight loss industry that explores the origins of our obsession with dieting As a nation battling an obesity epidemic we spend more than 35 billion annually on diets and diet regimens Our weight is making us sick unhappy and bigger than ever and we are willing to hand over our hard earned money to fix the problem But most people don t know that the diet industry started cashing in long before the advent of the Whopper The Hundred Year Diet is the story of America s preoccupation with diet deprivation and weight loss From the groundbreaking measurement of the calorie to World War I voluntary rationing to the Atkins craze Susan Yager traces our relationship with food weight culture science and religion She reveals that long before America became a Fast Food Nation or even a Weight Loss Nation it was an Ascetic Nation valuing convenience over culinary delight Learn how one of the best fed countries in the world developed some of the worst nutritional habits and why the respect for food evident in other nations is lacking in America Filled with food history cultural trivia and unforgettable personalities The Hundred Year Diet sheds new light on an overlooked piece of our weight loss puzzle its origins Social Sciences and Humanities Index ,1916 **Science Policy**

Under Thatcher Jon Agar,2019-06-03 Margaret Thatcher was prime minister from 1979 to 1990 during which time her Conservative administration transformed the political landscape of Britain Science Policy under Thatcher is the first book to examine systematically the interplay of science and government under her leadership Thatcher was a working scientist before she became a professional politician and she maintained a close watch on science matters as prime minister Scientific knowledge and advice were important to many urgent issues of the 1980s from late Cold War questions of defence to

emerging environmental problems such as acid rain and climate change Drawing on newly released primary sources Jon Agar explores how Thatcher worked with and occasionally against the structures of scientific advice as the scientific aspects of such issues were balanced or conflicted with other demands and values To what extent for example was the freedom of the individual scientist to choose research projects balanced against the desire to secure more commercial applications What was Thatcher s stance towards European scientific collaboration and commitments How did cuts in public expenditure affect the publicly funded research and teaching of universities In weaving together numerous topics including AIDS and bioethics the nuclear industry and strategic defence Agar adds to the picture we have of Thatcher and her radically Conservative agenda and argues that the science policy devised under her leadership not least in relation to industrial strategy had a prolonged influence on the culture of British science *Dictionary Catalog of Official Publications of the State of New York* ,1988 Includes information from the Checklist of official publications of the State of New York *The Chautauquan* ,1885
