, 1869 *The Musical Representation* Charles O. Nussbaum, 2007 How human musical experience emerges from the audition of organized tones is a riddle of long standing In *The Musical Representation* Charles Nussbaum offers a philosophical naturalist's solution Nussbaum founds his naturalistic theory of musical representation on the collusion between the physics of sound and the organization of the human mind brain He argues that important varieties of experience afforded by Western tonal art music since 1650 arise through the feeling of tone the sense of movement in musical space cognition emotional arousal and the engagement by way of specific emotional responses of deeply rooted human ideals Construing the art music

of the modern West as representational as a symbolic system that carries extramusical content Nussbaum attempts to make normative principles of musical representation explicit and bring them into reflective equilibrium with the intuitions of competent listeners Nussbaum identifies three modes of musical representation describes the basis of extramusical meaning and analyzes musical works as created historical entities performances of which are tokens or replicas In addition he explains how music gives rise to emotions and evokes states of mind that are religious in character Nussbaum s argument proceeds from biology psychology and philosophy to music and occasionally from music back to biology psychology and philosophy The human mind brain writes Nussbaum is a living record of its evolutionary history relatively recent cognitive acquisitions derive from older representational functions of which we are hardly aware Consideration of musical art can help bring to light the more ancient cognitive functions that underlie modern human cognition The biology psychology and philosophy of musical representation he argues have something to tell us about what we are based on what we have been
