The New Regional Economies William R. Barnes, Larry C. Ledebur, 1997-09-02 Traditionally we take a nationalist view of our economy Our politics and economics are wedded in the political economy of the nation state and the nationalist economic policies This nationalist paradigm is however showing signs of fatigue The role of the nation state is diminishing as the economy globalizes our national accounting systems are less effective technology forces change trading blocs are emerging there is less control of exchange rates regional economies are restructuring and competitive environments are changing This book poses that political jurisdictions are not economies but polities and explores the complex and important economic implications of this thesis In reality metropolitan centered economic regions are the basic economic units and the building blocks of the U S economy The linked interdependent system of local economic regions form the U S Common Market which in turn thrives within a global context of mutuality and interdependence William R Barnes and Larry C Ledebur s paradigm shift from the nation as the economy to the national system of local economic regions changes the framework in which we think about governance and policy and puts this book at the forefront of U S economic thought

public policy should be impartial Rather than playing the interests of one group versus those of another he argues convincingly that public policy should aim at enhancing the ex ante welfare for everyone if everyone did not know the position or the identity one would assume Using this conceptual device of the representative individual the analysis readily leads to policy implications that are both reasonable and concrete in diverse areas ranging from health care crime and punishment to macroeconomic and financial market stability The book concludes with a chapter summarizing the various principles of public policy practice that will meet the challenges of the new millennium These principles certainly of interest to academics in social sciences who are studying public policy political economy international financial systems and capital markets should appeal equally to practitioners including public policy makers consultants advisers administrators and public service trade unions

Blind Spots in the Spotlight Raluca Iacob,2022-06-17 This book brings under a magnifying glass a little explored but significant topic the communications changes of the National Bank of Romania after 2008 Given the similarities and differences between central banks mechanisms and practices adopted its applicability and impact for other actors are incontestable The research incorporates valuable details on how the National Bank of Romania s communication changed during the Great Recession of 2008 as well as insightful data about the way in which different categories of public and media perceived this change The timeliness and significance of this research are noticeable as the central banks already entered a new era of communication challenges triggered by the Covid 19 pandemic and recently by the Russia Ukraine war Lessons from the past can contribute to what researchers name the second revolution in communication focusing on opening the central banks to the public and regaining trust especially in such a difficult period
