The Purposes That Drive Our Lives Are God Given Edwin P. Nhliziyo Sr., 2014-04-10 This book makes the argument that humankind was placed here on earth to multiply fill the world and take dominion over all of God's other creations A purpose driven life will necessarily align with these purposes A purpose driven life is one that is fulfilling God's purposes How well we do this is the primary reason why some people have become very successful while others have failed Our spiritual side reflects our God connections and for the Christian it begins when one is born again While our purposes and the things that drive us may need adjustment after we are born again they do not change significantly They all have one common denominator and that is fulfilling our responsibilities as parents and doing that in obedience to God With this in mind it should not be difficult to answer the question what on earth am I doing here What drives our lives It is the need to provide for our children for adulthood comes with the obligation to find a life partner and begin multiplying and this is universal

The Site of Our Lives James S. Hans,1995-07-01 This book addresses the question of human uniqueness at a time when academic discourse has all but abandoned its long held commitment to the value of individuality Through an appraisal of the works of Emerson Nietzsche Heidegger Derrida and Foucault the author establishes the ways in which the current critique of the self has grossly distorted the nature of the debate by reducing it to a simple choice between essential or constructed selves Hans argues that the tradition that emerges from Emerson s work is based on a relational sense of the individual as much as it is devoted to the premise that we all have a specific form of integrity Likewise even though Nietzsche s critique of the fictional nature of the subject is the origin of contemporary visions of the fabricated self Nietzsche is equally insistent that each of us is a productive uniqueness we are all principles of selection whose links to the world embrace more than the social circumstances around us Nietzsche s vision of our productive uniqueness is carried on in larger and smaller ways by Heidegger Derrida and Foucault each of whom entertains a far more complex vision of the individual than those which currently dominate our ways of talking about what it means to be human
